Winner of the 2018 Christian Book Award for Bible of the Year. The Swindoll Study Bible offers the best of Chuck Swindoll's wit, charm, pastoral insight, and wise biblical study directly to you as you study God's Word. Chuck's warm, personal style comes across on every page, and his informed, practical insights get straight to the heart of the Bible's message for the world today. Reading each part of this study Bible is like hearing Chuck speak God's Word directly to your heart. It will both encourage readers' faith and draw them deeper into the study of God's Word. In Chuck's own words: "This study Bible was designed with you in mind. As you read the Scriptures, imagine my sitting beside you and sharing personal stories, important insights, and hard-earned lessons that will encourage you to walk more closely with Jesus Christ. You'll discover the who, what, where, when, why, and how of the Bible: Who wrote it and when? What does it mean, and where did its events occur? Why should I trust it? And most importantly, how can I apply it today?" It's that last question more than any other that has fed my passion to publish this Bible. My primary focus in ministry has been teaching biblical insight for living . . . for genuine life change. After all, that's why God has communicated His Word to us--so that we may become like His Son, Jesus Christ, the central figure of this Book." Free app with purchase! App includes all content from The Swindoll Study Bible and can be used across multiple devices with your Tecarta app account. Available for iOS and Android. One of the most important activities of enterprises today is responsible entrepreneurship. Corporate social responsibility (CSR) activities can help to forge a stronger bond between employees and corporations, can boost morale, and can help both employees and employers feel more connected with the world around them. Moreover, the growing importance of this concept results from the fact that it is perceived as an effective tool for increasing competitiveness, improving the image of the company, or contributing to the generation of higher profits. In today's world, an active commitment to social responsibility is becoming more common for a company. *CSR and Socially Responsible Investing Strategies in Transitioning and Emerging Economies* is an essential reference source that identifies the scale and scope of implementation of CSR and socially responsible investing strategies and standards in companies operating in different transitioning and emerging economies as well as assessing the global effects of these activities. Featuring research on topics such as economic growth, responsible investing, and business ethics, this book is ideally designed for managers, executives, directors, corporate professionals, government officials, industry leaders, academicians, students, and researchers in the fields of international economics, international business, marketing, finance management, and public relations.

Heterocycles feature widely in natural products, agrochemicals, pharmaceuticals and dyes, and their synthesis is of great interest to synthetic chemists in both academia and industry. The contributions of recent applications of new methodologies in C–H activation, photoredox chemistry, cross-coupling strategies, borrowing hydrogen catalysis, multicomponent and solvent-free reactions, regio- and stereoselective syntheses, as well as other new, attractive approaches for the construction of heterocyclic scaffolds are of great interest. This Special Issue is dedicated to featuring the latest research that is ongoing in the field of heterocyclic synthesis. It is expected that most submissions will focus on five- and six-membered oxygen and nitrogen-containing heterocycles, but structures incorporating other rings/heteroatoms will also be considered. Original research (communications, full papers and reviews) that discusses innovative methodologies for assembling heterocycles with potential application in materials, catalysis and medicine are therefore welcome.

This book constitutes the refereed proceedings of the 10th International Conference on Computer Information Systems, CISIM 2011, held in Kolkata, India, in December 2011. The 30 revised full papers presented together with 6 keynote tasks and plenary lectures were carefully reviewed and selected from 67 submissions. The papers are organized in topical sections on networking and its applications; agent-based systems; biometric applications; pattern recognition and image processing; industrial applications; algorithmic applications and data management; information and network security. *Corporate Reputation Decoded* is the first book of its kind that traces the journey of Indian companies in building corporate reputation (CR). The book addresses CR in the

Indian context and is in response to the growing interest of companies in this area. The book explains the process of building, maintaining and strategising for CR. It also discusses various aspects of CR—company's stakeholders, situations demanding CR interventions, and the impact of a company's culture, ethics and leadership on its CR. The book expounds on these using Indian cases (Tata, Infosys, HUL, Reliance, Aditya Birla Group, HDFC, among others), which enhance the understanding of CR in India as well as benchmark CR best practices in India. The book is of major significance to CR practitioners, scholars, teachers, students and C-Suite professionals who will also find the techniques proposed in the book interesting as they can assess, evaluate, adopt and adapt strategies followed by other companies for reputation enhancement.

With the considerable increase of AI applications, AI is being increasingly used to solve optimization problems in engineering. In the past two decades, the applications of artificial intelligence in power systems have attracted much research. This book covers the current level of applications of artificial intelligence to the optimization problems in power systems. This book serves as a textbook for graduate students in electric power system management and is also useful for those who are interested in using artificial intelligence in power system optimization.

Crisis management is often viewed as a short-term response to a specific event. While that is a part of the crisis management process, *Crisis Management in the New Strategy Landscape* takes a long term approach and offers a strategic orientation to crisis management. The text follows a four stage crisis management framework: Landscape survey (anticipating crisis events), strategic planning (setting up the crisis management team and plan), crisis management (addressing the crisis when it occurs), and organizational learning (applying lessons from crisis so they will be prevented, or at least mitigated in the future). Features & Benefits - Strategic approach used throughout the text - New trends in crisis management - Material on business ethics - What to do after the crisis - Case studies and vignettes at the beginning and end of each chapter

At the end of the Cold War security concerns are more about regional and civil conflicts than nuclear or Eurasian global wars. Stephen Cimbala argues that deterrence characteristics of the pre-Cold War period will in the 21st century again become normative.

This book is part of the Teach, Coach, Play series, emphasizing a systematic learning approach to sports and activities. Both visual and verbal information are presented so that readers can easily understand the material and improve performance. Built-in learning aids help readers master each skill in a step-by-step manner. Using the cues, summaries, skills, drills, and illustrations will help build a solid foundation for safe and effective participation now and in the future. The basic approach in all of the Teach, Coach, Play activity titles is to help readers improve their skills and performance by building mastery from simple to increasingly complex levels. The books strive to illustrate correct techniques and demonstrate how to achieve optimal results. The basic organization in each book is as follows: Section 1 overviews history, organizations and publications, conditioning activities, safety, warm up suggestions, and equipment. Section 2 covers exercise or skills, participants, action involved, rules, facility or field, scoring, and etiquette. Section 3 focuses on skills and drills or program design. Section 4 addresses a broad range of strategies specifically designed to improve performance now and in the future. Section 5 provides a convenient glossary of terms.

This book examines America's evolving strategy on the international security environment, and comprehensively analyzes how different strategies position states to compete in the present and future, manage risk, and prevail despite uncertainty.

This book presents the content of a year's course in decision processes for third and fourth year students given at the University of Toronto. A principal theme of the book is the relationship between normative and descriptive decision theory. The distinction

between the two approaches is not clear to everyone, yet it is of great importance. Normative decision theory addresses itself to the question of how people ought to make decisions in various types of situations, if they wish to be regarded (or to regard themselves) as 'rational'. Descriptive decision theory purports to describe how people actually make decisions in a variety of situations. Normative decision theory is much more formalized than descriptive theory. Especially in its advanced branches, normative theory makes use of mathematical language, mode of discourse, and concepts. For this reason, the definitions of terms encountered in normative decision theory are precise, and its deductions are rigorous. Like the terms and assertions of other branches of mathematics, those of mathematically formalized decision theory need not refer to anything in the 'real', i. e. the observable, world. The terms and assertions can be interpreted in the context of models of real life situations, but the verisimilitude of the models is not important. They are meant to capture only the essentials of a decision situation, which in real life may be obscured by complex details and ambiguities. It is these details and ambiguities, however, that may be crucial in determining the outcomes of the decisions.
