A series of workbooks offering integrated content and language support for specific subjects. Breakthrough to CLIL for Chemistry, Age 14+ helps ESL/EAL students get the most out of their studies when learning subjects through the medium of English. The workbook contains exercises set within the context of core topics to consolidate understanding, embedding practice in aspects of language central to the subject in question. It is designed to support any Chemistry curriculum for students aged 14-16, including UK GCSE, Cambridge IGCSE® and IB MYP. The book should be used alongside a core textbook and may be used within the classroom or as a self-study or homework resource.

This book investigates the syntax and semantics of proportional most and other majority quantifiers across a wide range of languages. The findings have implications for the study of a variety of crucial issues in linguistic theory, including number marking, partitivity, kind reference, and (in)definiteness marking.

Annotation. This collection of specially commissioned essays focuses on the forms, functions, and uses of contemporary German in the period of dynamic change following reunification. Some contributors address broad issues language and national identity, the status of German as an international language, language change and attempts to fix the form of the language, and sociolinguistic variation while others examine topics of particular significance in the current sociopolitical climate. These include social change and linguistic variation in Berlin after the Wall, the political language of the Right and Left, the speech of youth subcultures, language and gender, language and television, and language in intercultural communication. Reviews of the hardback edition 'This volume fills a void in up-to-date English-language information on German linguistics. Highly recommended for all college and university collections, as well as public libraries.' Choice, 33: 3, November 1995 'The appearance of this collection is timely. . .it updates us on important, immediate issues affecting German language and society' ?. . .while this work will be appreciated most by those focusing on sociolinguistics in the German-speaking context, those searching for comparative sociolinguistic material will find it a valuable source as well.' 'All in all, Stevenson has organized an interesting and useful volume for Germanophile sociolinguists and for those interested in a multidimensional real German.' Language Learning, 46:1, March 1996.

Additions to the second edition include a stronger focus on grammar, improved and extended ICT offerings and regular and rigorous assessment. The course has been improved to include comments from users, giving teachers the confidence that their students are provided with all the necessary support. Caminos segunda edicion is fully differentiated with activities at two levels of difficulty.-

Additional material on differentiated worksheets provides even more practice in all four skills at two levels of ability.

This study deals with a number of aspects of the words which are usually called adverbs in Latin. It contains on the one hand a critical discussion of their treatment in Latin grammatical studies -- the characteristics attributed to them, their relationship to other words -- and on the other hand a discussion of the conditions that have to be met in order to achieve a better (sub)classification -- general problems of classification as well as criteria for affecting such classification -- and a better description of the functions of adverbs in larger constructions. The study contains, therefore, both language-specific sections and more general ones. The author wrote the passages specifically dealing with Latin in such a way that they are clear enough to the non-Latinist, the more general passages in such a way that they are understandable for Latinists who are not acquainted with recent developments in linguistics.

The Student Edition includes 2 chapters per unit (including literature reading and content reading), embedded assessment, 3 kinds of vocabulary practice, and an "Apply & Extend" section with academic workshops and end-of-unit assessment. Using a unique embedded assessment plan along with a balanced blend of literature and content readings, Milestones ensures that students are mastering skills and standards before being introduced to new skills and standards. This consistent, research-based approach will lead your students to success on state exams as well as to the language acquisition and content knowledge crucial for academic success.

"To love your child is to teach your child." -Star Session Caleb, a smart, rambunctious, and funny little first grader is learning comparative and superlative grammar concepts in school. As a result of trying to apply the rules and concepts appropriately, he finds himself creatively forming new words that are not quite listed within the dictionary. Within I Love You the Mostest, words that have been used in the incorrect form are bold. Corresponding words that correct the mistakes are underlined and creatively placed shortly after within the book as learning reinforcement.

An aid to solving crosswords. It contains over 100,000 potential solutions, including plurals, comparative and superlative adjectives, and inflections of verbs. The list extends to first names, place names and technical terms, euphemisms and compound expressions, as well as abbreviations.

The result of over five years of close collaboration among an international group of leading typologists within the EURO-TYP program, this volume is about the morphology and syntax of the noun phrase. Particular attention is being paid to nominal inflectional categories and inflectional systems and to the syntax of determination, modification, and conjunction. Its areal focus, like that of other EURO-TYP volumes, is on the languages of Europe; but in order to appreciate what is peculiarly European about their noun phrases, a more comprehensive and genuinely typological view is being taken at the full range of cross-linguistic variation within this structural domain. There has been no shortage lately of contributions to the theory of noun phrase structure; the present volume is, however, unique in the extent to which its theorizing is empirically grounded.

Most societies in today's world are multilingual. 'Language contact' occurs when speakers of different languages interact and their languages influence each other. This book is an introduction to the subject, covering individual and societal multilingualism, the acquisition of two or more languages from birth, second language acquisition in adulthood, language change, linguistic typology, language processing and the structure of the language faculty. It explains the effects of multilingualism on society and language policy, as well as the consequences that long-term bilingualism within communities can have for the structure of languages. Drawing on the author's own first-hand observations of child and adult bilingualism, the book provides a clear analysis of such phenomena as language convergence, grammatical borrowing, and mixed languages.
