Passive and active safety systems (ABS, ESP, safety belts, airbags, etc.) represent a major advance in terms of safety in motoring. They are increasingly developed and installed in cars and are beginning to appear in two-wheelers. It is clear that these systems have proven efficient, although there is no information about their actual operation by current users. The authors of this book present a state of the art on safety systems and assistance to driving and their two-wheeled counterparts. The main components constituting a driving simulator are described, followed by a classification of robotic architectures. Then, a literature review on driving simulators and two-wheeled vehicles is presented. The aim of the book is to point out the differences of

perspectives between motor vehicles and motorcycles to identify relevant indicators to help in choosing the mechanical architecture of the motorcycle simulator and appropriate controls.

Contents 1. Driving Simulation. 2. Architecture of Driving Simulators. 3. Dynamics of Two-Wheeled Vehicles. 4. Two-Wheeled Riding Simulator: From Design to Control.

The 916 spearheaded the Ducati revival of the 1990s. Introduced at the end of 1993, this product of Massimo Tamburini and the Cagiva Research Centre took the water-cooled four-valve engine of the 851, placing it in an evolutionary chassis with revolutionary styling. The 916 immediately set new standards of performance for twin-cylinder machines, epitomised by its unequalled success in the World Superbike Championship. This book will trace the conception and development of the four-valve Ducati from its first appearance at the Bol d'Or in 1986. By 1990 Raymond Roche gave Ducati their first World Superbike Championship, this being followed by Texan Doug Polen. Star British rider Carl Fogarty then took over the reins, and along with Troy Corser and Troy Bayliss dominated the World Superbike Championship from 1994 until 2001. Along with the factory racers, all the related four-valve models will be covered in depth, from the initial 851 and 888, to the 748, ST4 and 996. All the variants, including the Sport Production series, will be detailed, along with the rare and beautiful Supermono. This book is the definitive guide to these legendary Ducati models. Ian Falloon is one of the world's leading motorcycle historians. Whether it's a big-bore, high-end custom sportbike you're after, or a naked, bare knuckles streetfighting drag racer, this book has the goods for getting you there. In three different scenarios, the nation's top builders give blow-by-blow instructions for completely rebuilding three popular streetbikes -- from performance modifications and exhaust systems to flawless finishes and detail work. Focusing on highly customized Hayabusa drag bikes, including a slammed and lowered Suzuki GSX1300R Hayabusa, John Dantzer of the Charlotte, North Carolina, shop Two Wheel Customs outlines the suspension and engine modifications that the serious street and quarter-mile racer can make. He takes a salvaged, late-model four-cylinder street machine and transforms it into the kind of machine that both professional stunt riders and corner-carving enthusiasts favor. Next, author Mike Seate covers the details on constructing and installing popular modifications -- everything from engine crash guards and wheelie bars to motocross-style handlebars and bikini fairings -- while stunt riders and streetfighter builders from the United States and Europe weigh in with tips and advice. Last but not least, the builders at Wisconsin's Patrick's Performance and South Carolina's Coastal Motorcycles provide a step-by-step account of the construction of two high-end custom sportbikes -- transforming a Yamaha YZF R-1 and a Suzuki GSX-R 1000 into the kind of machines that are eye-popping everywhere-on the streets or on the motorcycle show circuit.

Inhaltsangabe:Zusammenfassung: Die KTM-Sportmotorcycle

AG ist ein Motorradhersteller mit Sitz in Mattighofen/Österreich. KTM baut rennsporttaugliche Motorräder und hat sich durch zahlreiche Weltmeistertitel und Rallye Siege als weltweit erfolgreichste Motorradmarke im Offroad-Sport etabliert. Um das Ziel, innerhalb der nächsten fünf Jahre größter Motorradhersteller in Europa zu werden, zu erreichen, reicht allerdings ein Ausbau der weltweiten Marktführerschaft im racingorientierten Offroad-Segment nicht aus. Daher ist eine Ausdehnung der Produktpalette in Richtung sportives Straßensegment geplant. Die Markteinführung der KTM 990 Duke im Modelljahr 2005 ist deshalb von besonderer strategischer Bedeutung für die KTM-Sportmotorcycle AG, weil es sich um das erste reinrassige Zweizylinder-Straßenmotorrad der Marke KTM handelt. In weiterer Folge kommt eine V2-Supermoto auf den Markt. Im Modelljahr 2007 folgt das Superbike KTM 990 RC8. Die KTM 990 Duke bildet also die Basis für die nachhaltige Etablierung der Marke im sportorientierten Straßensegment. Da der Motorradmarkt weitgehend gesättigt und der Konkurrenzdruck sehr stark ist, ist eine aktive Gestaltung der Stellung der KTM 990 Duke auf dem Markt mittels eines ausgereiften Positionierungs- und Kommunikationskonzeptes unerlässlich. Die Positionierung wird nicht zu Unrecht als die hohe Schule des Marketing bezeichnet. Unter Positionierung versteht man die Abgrenzung des eigenen Angebots gegenüber Mitbewerberangeboten. Sie ist darauf ausgerichtet, dass ein Produkt ein eigenständiges und unverwechselbares Profil gewinnt, das für die Konsumenten attraktiv ist und in der Folge dazu führt, dass sie das Produkt den Konkurrenzprodukten vorziehen. Die Umsetzung der Positionierung erfolgt im Rahmen der Kommunikationsstrategie. Nach Auffassung der Marketingwissenschaft und praxis ist im Kommunikationsbereich der Ansatz der integrierten

Kommunikation maßgeblich. Unter integrierter Kommunikation versteht man die formale, inhaltliche und zeitliche Abstimmung der Kommunikationsmaßnahmen. Dadurch wird dem Kunden ein konsistentes Bild der Marke vermittelt und darüber hinaus können Synergieeffekte erzielt und Kostensenkungspotentiale realisiert werden. Sowohl die Positionierung als auch die integrierte Kommunikation sind aufgrund ihrer strategischen Ausrichtung und der erheblichen Investitionen mit denen die Umsetzung einer Positionierung einhergeht von großer Bedeutung für das Marketing. Die Neupositionierung [...]
