Introducing “How To Cook In A Jiffy”: The Easiest Cookbook On Earth From The Author Of The Hugely Popular Website www.cookinginajiffy.com Amazon Top 5 Best Seller in Cooking for One Never boiled an egg before but want to learn the magic art of cooking? Then don't leave home without this Survival Cookbook. Be it healthy college cooking, or cooking for a single person or even outdoor cooking---this book helps you survive all situations by teaching you how to cook literally in a jiffy. ??? Think College * You have an offer from your dream college; * You do have accommodation in a nearby dorm, hostel, hall of residence, apartment; * You think you can survive on take aways but realize that many a times you have to be on your own; * You know you can save some money and have healthier stuff if you could rustle up something yourself; * The problem: you don't know how to even boil an egg; Then you are like me and this book is for YOU. ??? Think Job * You've your dream job offer from your favourite firm; * Problem: you have to relocate to a new town; * You've to live in an apartment all by yourself; * Horror of horrors, your apartment has a kitchen that you don't know what to do with; * And this being a peaceful, residential area, the nearest restaurant is some five miles away; Then you are like me and this book is for YOU. ??? Think Outdoors * You love the mountains and the rugged outdoors; * You have friends who share your passion; * Your friends love to carry some fresh home-made sandwiches and salads; * They can also whip up a mean omelette on the camp fire if need be; * While you don't even know how to break an egg properly; Then you are like me and this book is for YOU. ??? This Book is Unique because: * It is based on the author's first-hand experience of bumbling about, as he says, in the “wonderlands of cooking” in London where he was pursuing a Law degree for four years; * This is for the absolute newbie; * Where this book scores over other “How To” cookbooks is in the manner in which it treats no question as “too stupid”; * Its next USP is its very logical and structured approach in which it follows a step by step “graduation” process; * You start with some very basic cooking techniques such as how to break, poach, fry, boil (and peel) an egg, learn how to handle chicken, vegetables and fish and then “graduate” to making such “complicated” recipes as cheese omelette, vegetables au gratin, baked chicken or French Onion Soup; * Most uniquely, the book teaches you the concept of “sequencing and parallel processing” in cooking that should enable busy people to create a 3-4 course meal in less than 30 minutes; * Don't believe me---then just scroll up and look inside. ??? Convinced... * That this book is exactly what the Doctor ordered; * Or, that you're NOT such a newbie after all, but your nephew or niece who has just gone to college or starting to work, should benefit from such a book; Then scroll up to Add to Cart a copy of this easiest cookbook on earth, at the honest to goodness prices that only a fellow traveller on this complicated road of cooking can offer. Featuring international contributions from leading and emerging scholars, this innovative Research Handbook presents a panoramic view of how law sees visual art, and how visual art sees law. It resists the conventional approach to art and law as inherently dissonant – one a discipline preoccupied with rationality, certainty and objectivity; the other a creative enterprise ensconced in the imaginary and inviting multiple, unique and subjective interpretations. Blending these two distinct disciplines, this unique Research Handbook bridges the gap between art and law.

A helpful, engaging guide to the revision of scholarly writing by an editor and award-winning author“Pamela Haag has been called ‘the tenure whisperer’ for good reason. Any scholar who hopes to attract a wider audience of readers will benefit from the brilliant, step-by-step guidance shared here. It's pure gold for all aspiring nonfiction writers.”—Nancy MacLean, author of *Democracy in Chains: The Deep History of the Radical Right's Stealth Plan for America* Writing and revision are two different skills. Many scholar-writers have learned something about how to write, but fewer know how to read and revise their own writing, spot editorial issues, and transform a draft from passable to great. Drawing on before and after examples from more than a decade as a developmental editor of scholarly works, Pamela Haag tackles the most common challenges of scholarly writing. This book is packed with practical, user-friendly advice and is written with warmth, humor, sympathy, and flair. With an inspiring passion for natural language, Haag demonstrates how to reconcile clarity with intellectual complexity. Designed to be an in-the-trenches desktop reference, this indispensable resource can help scholars develop a productive self-editing habit, advise their graduate and other students on style, and, ultimately, get their work published and praised.

Now there's a single easy-reading reference to help you plan, implement, and audit a HACCP (Hazard Analysis and Critical Control Point) program. HACCP User's Manual provides comprehensive information on new and existing HACCP systems, current U.S. Food and Drug Administration (FDA) and U.S. Department of Agriculture (USDA) regulations, and procedures for application of the system, as well as sanitation standard operating procedures (SSOPs). With more than 30 years' experience in the food industry, Don Corlett is eminently qualified to guide you step-by-step through the process of tailoring and operating a HACCP system to fit your operation. In HACCP User's Manual, you find expert tips for getting started, details on how to develop and implement a HACCP plan, and how to operate the HACCP system, including organization of record-keeping techniques.

Thirty-nine-year-old Rose is content with her safe life: both her job writing manuals for appliances and her long-term boyfriend are reasonably satisfying. But when Mr. Almost Right betrays her, Rose decides there has to be more to it than writing succinct descriptions about how to use the timer on a Pause 'n Serve coffeemaker. Lured by the therapeutic promise of Cape Cod's sand, salt, and waves, Rose abandons her careful past and leaves the city far behind. Rose wants only to heal her broken heart. But with the help of a few eccentric neighbors, a fulfilling new job as the world's oldest cub reporter, and a compellingly odd new man, she comes to realize that her past is the furthest thing from her mind -- and she may just have stumbled upon her future happiness.

Anyone who uses Blender needs this book. Blender users know that it can be used for modeling, animation, and rendering, but it can also be used as a fully functional compositing and post-production application. This book explores Blender's use as a compositing and post-production tool in the video and film production pipeline. In this book, you will learn how to: Create and apply masks and special effects in Blender Composite images using Blender's node-based compositor Sequence and overlay video and audio using Blender's non-linear editor

A survival guide for writers in the real-world, *Writing and Designing Manuals*, Third Edition has become a standard reference for technical writers and editors. Readable and practical, it addresses all aspects of manual development from choosing a format to writing effective warnings. Not limited to text elements, the manual also provides guidance for designing illustrations to complement the text and underscore the safety warnings. The completely revised and updated Third Edition includes: P Current materials on desktop publishing P Alternative media such as videos, CD-ROMs, and on-line help P The impact of new technology such as CD-ROMs and digital cameras on manual design and production P New regulations for products sold overseas P Impact of the Internet on manual design Gone are the days when a manual might be a few pages of typewritten text. Thanks to the advances in computer technology, even tiny companies can produce slick, professional publications. *Writing and Designing Manuals*, Third Edition guides you through the messy, complex, frustrating, and fascinating business of producing manuals.

Make your 3D world a reality Some of the dramatic visual effects you've seen in top-grossing movies and heralded television series got their start in Blender. Create 3D characters—no experience required Build scenes with texture and real lighting features Animate your creations and share them with the world Avoid common rookie mistakes This book is the ideal starting place for newcomers to the world of 3D modeling and animation.

From teaching disadvantaged adolescents to affluent elementary school children, and working with principals ranging from a supportive humanist to a data-nut despot, the second year of Steve Hepting's career is far from boring. Set in 2004, the timeless numbness of the education bureaucracy, the comedic antics of students in the classroom, and the foibles of teacher and support staff colleagues ring as true today as they did then. The life of a school comes alive with zest, pathos, and humor. Given the tortuous career road he has chosen, can Steve ever return to the much more sedate stock broker occupation he once enjoyed?

The international multi-topic conference IMTIC 2008 was held in Pakistan during April 11–12, 2008. It was a joint venture between Mehran University, Jamshoro, Sindh and Aalborg University, Esbjerg, Denmark. Apart from the two-day main event, two workshops were also held: the Workshop on Creating Social Semantic Web 2.0 Information Spaces and the Workshop on Wireless Sensor Networks. Two hundred participants registered for the main conference from 24 countries and 43 papers were presented; the two workshops had overwhelming support and over 400 delegates registered. IMTIC 2008 served as a platform for international scientists and the engineering community in general, and in particular for local scientists and the engineering community to share and cooperate in various fields of interest. The topics presented had a reasonable balance between theory and practice in multidisciplinary topics. The conference also had excellent topics covered by the keynote speeches keeping in view the local requirements, which served as a stimulus for students as well as experienced participants. The Program Committee and various other committees were experts in their areas and each paper went through a double-blind peer review process. The conference received 135 submissions of which only 46 papers were selected for presentation: an acceptance rate of 34%.

Every day we interact with thousands of consumer products. We not only expect them to perform their functions safely, reliably, and efficiently, but also to do it so seamlessly that we don't even think about it. However, with the many factors involved in consumer product design, from the application of human factors and ergonomics principles to reducing risks of malfunction and the total life cycle cost, well, the process just seems to get more complex. Edited by well-known and well-respected experts, the two-volumes of *Handbook of Human Factors and Ergonomics in Consumer Product Design* simplify this process. The second volume, *Human Factors and Ergonomics in Consumer Product Design: Uses and Applications*, discusses challenges and opportunities in the design for product safety and focuses on the critical aspects of human-centered design for usability. The book contains 14 carefully selected case studies that demonstrate application of a variety of innovative approaches that incorporate Human Factor and Ergonomics (HF/E) principles, standards, and best practices of user-centered design, cognitive psychology, participatory macro-ergonomics, and mathematical modeling. These case studies also identify many unique aspects of new product development projects, which have adopted a user-centered design paradigm as a way to attend to user requirements. The case studies illustrate how incorporating HF/E principles and knowledge in the design of consumer products can improve levels of user satisfaction, efficiency of use, increase comfort, and assure safety under normal use as well as foreseeable misuse of the product. The book provides a comprehensive source of information regarding new methods, techniques, and software applications for consumer product design.

It is a truth widely acknowledged that if you're pregnant and can afford one, you're going to pick up a pregnancy manual. From *What to Expect When You're Expecting* to *Pregnancy for Dummies*, these guides act as portable mentors for women who want advice on how to navigate each stage of pregnancy. Yet few women consider the effect of these manuals—how they propel their readers into a particular system of care or whether the manual they choose reflects or contradicts current medical thinking. Using a sophisticated rhetorical analysis, Marika Seigel works to deconstruct pregnancy manuals while also identifying ways to improve communication about pregnancy and healthcare. She traces the manuals' evolution from early twentieth-century tomes that instructed readers to unquestioningly turn their pregnancy management over to doctors, to those of the women's health movement that encouraged readers to engage more critically with their care, to modern online sources that sometimes serve commercial interests as much as the mother's. The first book-length study of its kind, *The Rhetoric of Pregnancy* is a must-read for both users and designers of our prenatal systems—doctors and doulas, scholars and activists, and anyone interested in encouraging active, effective engagement.

This book will introduce you to the controls and steer you towards understanding what Blender can do. With this program you can create 3D models of objects and characters. The objects and characters can be placed in scenes. The scenes are captured by camera and rendered into digital images. The objects and characters can be animated and then, again, captured by camera and rendered to video files. Video files can then be compiled into movies. This book will show you how to make the Blender program go through some of its paces and give you an insight into this fantastic world. You will be shown the controls and given operation instructions allowing you to activate a variety of features. This book is a course in contrastive linguistics and translation which introduces the basics of linguistic analysis as applied to translation. Translation is presented as a problem-solving activity and linguistic analysis is proposed as a useful methodological tool to identify a wide range of translation problems. The course adopts a method which starts with the translation of words and goes up, step by step, through the different levels of linguistic structure to the level of pragmatic context. Myriad examples and a wide variety of exercises enable readers to acquire and practise some of the most common strategies translators use to solve the problems encountered at the different levels of linguistic analysis. The book aims at providing students with the theoretical and methodological tools needed to reinforce their linguistic and textual competence in the languages involved and make adequate progress along the translation process. As theoretical tools, students are given an overview of basic translation concepts and linguistic tools central to contrastive linguistics and textual analysis. As methodological tools, students are presented with a working method that, at the beginning, will allow them to grasp the principles and strategies that govern general translation, and which they could later extrapolate to specialised translation.

An opinionated, illustrated guide for cocktail beginners, covering the basics of spirits plus making and drinking cocktails, written by celebrated craft cocktail bartender Jeffrey Morgenthaler. This easy-reading, colorful introduction for cocktail beginners, with approximately 100 succinct lessons on drinking culture, spirits, and cocktail making, is delivered in the pithy, wry style Morgenthaler is known for in his instructional videos and writing for beverage publications. Novices will learn how to order a drink, how to drink with the boss, how to drink at the airport, and more. Twelve perfect starter recipes—ranging from a Dry Gin Martini to a Batched Old-Fashioned (perfect for the flask)—plus thirty original illustrations round out this distillation for new enthusiasts.

Hailed by Booklist as “two talented authors who vividly bring to life the beauty of New Mexico and its people,” Sue Boggio and Mare Pearl return in *A Growing Season* to Esperanza, New Mexico, the setting of their first book, *Sunlight and Shadow*. Esperanza is a community at the crossroads where a devastating drought threatens the farming community's very survival. Vultures circle in the form of developers who see failing farms as ripe pickings for a bedroom community for Albuquerque. Court battles pit the endangered silvery minnow against the farmers as the once mighty Rio Grande shrinks from its banks even as demand for its precious water increases.
