This book is dedicated to improving healthcare through reducing delays experienced by patients. With an interdisciplinary approach, this new edition, divided into five sections, begins by examining healthcare as an integrated system. Chapter 1 provides a hierarchical model of healthcare, rising from departments, to centers, regions and the “macro system.” A new chapter demonstrates how to use simulation to assess the interaction of system components to achieve performance goals, and Chapter 3 provides hands-on methods for developing process models to identify and remove bottlenecks, and for developing facility plans. Section 2 addresses crowding and the consequences of delay. Two new chapters (4 and 5) focus on delays in emergency departments, and Chapter 6 then examines medical outcomes that result from waits for surgeries. Section 3 concentrates on management of demand. Chapter 7 presents breakthrough strategies that use real-time monitoring systems for continuous improvement. Chapter 8 looks at the patient appointment system, particularly through the approach of advanced access. Chapter 9 concentrates on managing waiting lists for surgeries, and Chapter 10 examines triage outside of emergency departments, with a focus on allied health programs. Section 4 offers analytical tools and models to support analysis of patient flows. Chapter 11 offers techniques for scheduling staff to match patterns in patient demand. Chapter 12 surveys the literature on simulation modeling, which is widely used for both healthcare design and process improvement. Chapter 13 is new and demonstrates the use of process mapping to represent a complex regional trauma system. Chapter 14 provides methods for forecasting demand for healthcare on a region-wide basis. Chapter 15 presents queueing theory as a method for modeling waits in healthcare, and Chapter 16 focuses on rapid delivery of medication in the event of a catastrophic event. Section 5 focuses on achieving change. Chapter 17 provides a diagnostic for assessing the state of a hospital and using the state assessment to select improvement strategies. Chapter 18 demonstrates the importance of optimizing care as patients transition from one care setting to the next. Chapter 19 is new and shows how to implement programs that improve patient satisfaction while also improving flow. Chapter 20 illustrates how to evaluate the overall portfolio of patient diagnostic groups to guide system changes, and Chapter 21 provides project management tools to guide the execution of patient flow projects.

Global Investigations Review's The Practitioner's Guide to Global Investigations covers what to do at every stage during the lifecycle of a corporate investigation - from discovery of the initial problem to conclusion and beyond. Using US and UK practice and procedure to illustrate, the guide tracks the development of a serious allegation (whether originating inside or outside a company) as it develops - looking at the key risks that arise and the challenges it poses, along with the opportunities that may exist for its resolution. It offers expert insight into fact-gathering (including document preservation and collection, and witness interviews); structuring the investigation (the complexities of cross-border privilege issues); and strategizing effectively to resolve cross-border probes and manage corporate reputation. Further content provides detailed comparable surveys of the relevant law and practice in 12 jurisdictions that build on many of the vital issues highlighted. It is practical guide for external and in house legal counsel, compliance officers and accounting practitioners wishing to benchmark their practice against leaders in the field. Edited by Judith Seddon, Eleanor Davison, Christopher J Morvillo, Michael Bowes QC and Luke Tolaini, the book has 47 chapters contributed by leading practitioners and firms across the world such as Baker & McKenzie LLP, Clifford Chance LLP, Skadden, Arps, Slate, Meagher & Flom LLP. “Global Investigations Review's The Practitioner's Guide to Global Investigations is the most comprehensive publication currently on the market in relation to cross-border, multifaceted corporate investigations.
