Trusted test prep for aspiring Texas-based teachers.

Major macroeconomic realignments are affecting prospects differentially across the world's countries and regions. The April 2016 WEO examines the causes and implications of these realignments—including the slowdown and rebalancing in China, a further decline in commodity prices, a related slowdown in investment and trade, and declining capital flows to emerging market and developing economies—which are generating substantial uncertainty and affecting the outlook for the global economy. Additionally, analytical chapters examine the slowdown in capital flows to emerging market economies since their 2010 peak—its main characteristics, how it compares with past slowdowns, the factors that are driving it, and whether exchange rate flexibility has changed the dynamics of the capital inflow cycle—and assess whether product and labor market reforms can improve the economic outlook in advanced economies, looking at the recent evolution and scope for further reform, the channels through which reforms affect economic activity under strong versus weak economic conditions, reforms' short- to medium-term macroeconomic effects, and sequencing of reforms and coordination with other policies to maximize their potential quantitative economic benefits. A special feature analyzes in depth the energy transition in an era of low fossil fuel prices.

Education continues to remain at the forefront of research and discussion in the United States. As a result, the requirements for teachers to be able to teach in the classroom have become

more stringent. More specifically, No Child Left Behind requires states to test pre-service teachers, upon graduation, in the content areas in which they will teach to ensure that teachers are "highly qualified" as mandated by this federal law. In order to successfully pass state examinations, teachers should be prepared through some type of teacher preparation program. Previous research suggests that preparation plays an integral role in teacher effectiveness however, researchers have not defined what constitutes appropriate teacher preparation. One example of a preparation program at a large, urban university in Texas prepares pre-service teachers to pass the TExES Exam, the state certification exam in Texas. The purpose of this study was to examine pre-service teacher scores on the EC-4 Generalist and EC-6 Generalist TExES exams, overall scores and content area scores, in order to assess which content areas are challenging. The TExES scores that have been examined are from testees who attended the teacher preparation program at this large, urban university in Houston. Although a high percentage of pre-service teachers are passing the TExES exam, findings indicate that it is important to align the preparation program standards with the test standards to address those pre-service teachers who are failing the overall exam and/or content areas on the exams.
