

Dr Leonard Coldwell

This comedy is a fictitious "ED WOOD" type screenplay about the making of "MANOS The Hands of Fate." Harold P. Warren (October 23, 1923 - December 26, 1985), better known as Hal Warren, was an insurance and fertilizer salesman who lived in the El Paso, Texas area. He is best remembered for writing, directing, and producing the 1966 movie "Manos" The Hands of Fate. Manos is remembered as one of the worst films of all time. Warren made Manos on a bet. He had met Stirling Silliphant, who was in the area scouting locations for a film. Warren bet Silliphant (who would later write the award winning screenplay for In the Heat of the Night) that he could make a successful horror movie on a limited budget. Warren raised about \$20,000. He managed to find an old 16-millimeter Bell & Howell camera to use on the film. Because the camera was spring wound, it could only shoot just over 30 seconds of film at a time. After casting himself in the starring role of Michael, he approached locals to play the other roles, as well as fill crew positions. He did not pay anyone, instead promising people a percentage of the profits. Warren and two others also dubbed all the voices, as the camera was not capable of capturing sound. For two months, Warren, the cast, and crew filmed at County Judge Colbert Coldwell's ranch. Warren's prima donna attitude caused much friction among those working on the film, who began calling the film Mangos: The Cans of Fruit behind his back. When the time came to premiere the film in El Paso, Warren turned the premiere into a media event. He hired a limousine to carry the cast to the theater. But a few minutes into the film, the audience began heckling it, and soon broke down into hysterics. Manos had a short run on some drive-in theaters in West Texas. Afterwards, the movie was largely forgotten until it was featured in Mystery Science Theater 3000 in 1993. This is how the film MIGHT have been made...

One of Newsweek's Most Highly Anticipated New Books of 2021 Family secrets emerge as a best-selling author dives into the history of the mob in small-town America. Best-selling author Russell Shorto, praised for his incisive works of narrative history, never thought to write about his own past. He grew up knowing his grandfather and namesake was a small-town mob boss but maintained an unspoken family vow of silence. Then an elderly relative prodded: You're a writer—what are you gonna do about the story? Smalltime is a mob story straight out of central casting—but with a difference, for the small-town mob, which stretched from Schenectady to Fresno, is a mostly unknown world. The location is the brawny postwar factory town of Johnstown, Pennsylvania. The setting is City Cigar, a storefront next to City Hall, behind which Russ and his brother-in-law, "Little Joe," operate a gambling empire and effectively run the town. Smalltime is a riveting American immigrant story that travels back to Risorgimento Sicily, to the ancient, dusty, hill-town home of Antonino Sciotto, the author's great-grandfather, who leaves his wife and children in grinding poverty for a new life—and wife—in a Pennsylvania mining town. It's a tale of Italian Americans living in squalor and prejudice, and of the

rise of Russ, who, like thousands of other young men, created a copy of the American establishment that excluded him. *Smalltime* draws an intimate portrait of a mobster and his wife, sudden riches, and the toll a lawless life takes on one family. But *Smalltime* is something more. The author enlists his ailing father—Tony, the mobster's son—as his partner in the search for their troubled patriarch. As secrets are revealed and Tony's health deteriorates, the book becomes an urgent and intimate exploration of three generations of the American immigrant experience. Moving, wryly funny, and richly detailed, *Smalltime* is an irresistible memoir by a masterful writer of historical narrative.

By all standards of success, James Templeton seemed to have it all. He was a highly successful businessman, had a beautiful wife and daughter, and, only in his early thirties, had his whole life in front of him. To avoid the same fate as his father and grandfather, who both died of heart attacks at a young age, James became an avid runner—a passion that he believed helped him stay fit and healthy. Imagine his shock when, during a routine physical, his doctor noticed a mole on his body that turned out to be a melanoma—a dangerous form of skin cancer. The mole was removed immediately and James, who was diligent in his follow-up exams, appeared to be cancer-free—but only for a short while. When the cancer reappeared and had spread, on the advice of his doctor, James followed the conventional medical protocol, which included surgery and chemotherapy. He was also involved in a clinical trial. When he learned that the treatments weren't working, James was obviously devastated. He had reached a new low point in his life, and as he lay in the hospital bed, he prayed fervently for help. As if by some miracle, help came to James in the form of three different visitors who would change the course of his life—and help direct him on a path back to health. *I Used to Have Cancer* is James Templeton's memoir—an inspiring look back at his unique journey in overcoming stage 4 melanoma. James takes you with him on a trip crisscrossing America, during which he shares the various natural approaches he followed to battle his cancer—from diet and supplements to meditation and lifestyle adjustments. As his journey continued, you will see first-hand how James' definition of success changed from making money to seeing the next sunrise. And how he continues finding success by reaching out to others to share the lessons he has learned. While this book largely focuses on the various methods James used to overcome his own cancer, it is also an inspiring story of not giving up when all other avenues of conventional medicine fail. It is about taking control of your life and finding a way back from the brink of death. It is about being able to tell your friends, "I used to have cancer."

The Youngs' program includes over 50 recipes and explains which foods to eat, which to avoid, and which supplements can help on the way towards optimal health and weight loss. In just weeks, readers will find they have more energy and a stronger immune system, and will have shed pounds and inches.

When it comes to cancer, conventional doctors are trained to treat their patients exclusively with surgery, radiation, and chemotherapy. These methods are grueling on the whole body - and they don't treat beyond the tumor or the cancer itself. The focus is on the disease, not the whole person - and because of this, the outcomes in conventional medicine can be bleak. But it doesn't have to be this way. Dr. Leigh Erin Connealy has developed a whole-person approach to treating cancer - and these treatments have helped thousands of patients through her Cancer Center for Healing. In *The Cancer Revolution*, Dr. Connealy shows you how to get to the root causes of cancer and the practical steps you can take to get back on the path to healing -- from balancing your body's chemistry with nutritional supplements, following a healthy food plan, detoxifying your body and home, exercising regularly, getting deep restful sleep every night, practicing stress reduction techniques, and putting together a supportive healing team. Chemotherapy and radiation have their place in treatment, but in many cases, they are simply not enough, because cancer isn't caused by one thing, but by many different factors. All of these causes must be addressed, not just

the tumor. The Cancer Revolution will equip you to make impactful, achievable lifestyle choices that fight the root of the disease, and that offer hope for recovery and a cancer-free life.

Statins are widely prescribed to lower blood cholesterol levels and claim to offer unparalleled protection against heart disease. Believed to be completely safe and capable of preventing a whole series of other conditions, they are the most profitable drug in the history of medicine. In this groundbreaking book, GP Malcolm Kendrick exposes the truth behind the hype. He will change the way we think about cholesterol forever. Rubbishing the diet-heart hypothesis, in which clinical trials 'prove' that high cholesterol causes heart disease and a high-fat diet leads to heart disease, Kendrick lambastes a powerful pharmaceutical industry and unquestioning medical profession, who, he claims, perpetuate the madcap concepts of 'good' and 'bad' cholesterol and cholesterol levels to convince millions of people to unnecessarily spend billions of pounds on statins. Clearly and comprehensively debunking assumptions on what constitute a healthy lifestyle and diet, "The Great Cholesterol Con" is the accessible, indispensable and absorbing case against statins and for a more common-sense approach to heart disease and general wellbeing. No more over-hyped miracle drugs; no more garlic, red wine, anti-oxidants, fruit or vegetables; even a vegetarian diet is rejected in this controversial yet authoritative critique of how we have been misled over how food and drugs affect our coronary health. Here, for the first time, is the invaluable guide for anyone who though there was a miracle cure for heart disease, "The Great Cholesterol Con" is a fascinating breakthrough that will set dynamite under the whole area.

How could somebody like me develop Breast Cancer? That very question led to thousands of hours of research, study, soul-searching and prayer. It all came together as The 7 Essentials - 7 basic steps that are necessary for preventing and healing cancer, or any disease for that matter.

A book about choices. A book to empower all cancer sufferers and their families. In March 2011 Laura Bond's mother Gemma was diagnosed with ovarian and uterine cancer. Laura discovered that the only thing more shocking than telling someone your mother has cancer was revealing that she had declined chemotherapy. But, according to studies, many oncologists would do the same. So Laura, a journalist, started writing a blog to explain her mother's decision to say 'no' to mainstream medicine and 'yes' to hydrogen peroxide, vitamin C injections and infrared saunas. Mum's Not Having Chemo shares Gemma's natural healing story as well as advice from over 60 of the world's leading cancer specialists and holistic healers - from oncologists in Tokyo to energy healers in Harley Street. If you want to explore alternative options, or find ways to supplement your conventional care, this book provides cutting edge research from around the world and describes treatments road-tested by Gemma and other cancer survivors. It's an invaluable and uplifting companion to help you make the best choices for your own healing journey.

All illness comes from lack of energy, and the greatest energy drainer is mental and emotional stress, which I believe to be the root cause of all illness. Stress is one of the major elements that can erode energy to such a large and permanent extent that the immune system loses all possibility of functioning at an optimum level. The Only Answer to Cancer is a book of hope, and I want you to understand that there is always hope, no matter how bad your health situation is right now. Your journey to ultimate health begins today!

This book illustrates how time travel will be discovered in one thousand years and documents how these futuristic humans have traveled back in time to interact with us throughout history and are here with us today. Many self-hypnosis exercises are provided, including fifth dimension travel and teleportation, to train the reader to contact these time travelers and travel in time themselves. Why is it that certain intervals, scales and tones sound genuine and others false? Is the modern person able to experience a qualitative difference in a tone's pitch? If so, what are the implications for modern concert pitch and how instruments of fixed tuning are tuned? Maria Renold tackles these and many other questions, providing a wealth of scientific data. Her pioneering work is the result of a lifetime's research into Western music's Classical Greek origins, as well as a search for new developments in modern times. She strives to deepen musical understanding through Rudolf Steiner's spiritual-scientific research, and she also elucidates many of Steiner's often puzzling statements about music.

Part biography, part health education, part social commentary, this 132-page paperback explores the candid, controversial life and unconventional pathology skills of noted healer and nutritionist Dr. Sebi. Written in interview style and published on the 20th anniversary of Dr. Sebi's acquittal by the New York Supreme Court, *Seven Days in Usha Village: A Conversation with Dr. Sebi*, exposes readers to the healer's updated views on health and nutrition as he speaks from his native home Honduras, Central America. Beverly Oliver, the book's editor, tape recorded the seven-day interview in November 2005. She chose excerpts that shed light on Dr. Sebi's 25-year relationship with community activists, political leaders and celebrities, including Michael Jackson and the late hip hop singer Lisa "Left Eye" Lopes. The book also includes Dr. Sebi's relentless appeals to Black Americans specifically, and more broadly the general public, to change generations of harmful food consumption. The book's glossary contains chemical and botanical definitions as well as descriptions of historical figures in music, education, health, religion, and philosophy.
