David R. Hakes (University of Northern Iowa) has prepared a study guide that will enhance your success. Each chapter of the study guide includes learning objectives, a description of the chapter's context and purpose, a chapter review, key terms and definitions, advanced critical-thinking questions, and helpful hints for understanding difficult concepts. You can develop your understanding of the material by doing the practice problems and answering the short-answer questions. Then you can assess your mastery of the key concepts with the self-test, which includes true/false and multiple-choice questions. Visit <http://www.cengagebrain.com> for more information on the Study Guide. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

"Resources for agricultural science are scarce across the world. Yet even as resources are shrinking, agricultural science has expanded its inquiry into many new areas - such as environmental preservation, food quality, and rural development - without forsaking its more traditional concerns. In a time of tight government budgets, research administrators are faced with the need to provide strong evidence that costs are justified by benefits. Science under Scarcity is an invaluable guide to the theory and methods necessary for evaluating research in agriculture and for setting priorities for resource allocation." "Although economists have made significant progress in developing more sophisticated methods for research evaluation and priority setting, many research analysts and administrators do not have a working knowledge of those practices. Without the assistance of formal economic analysis it is particularly difficult to assess the social value of new technologies or to make informed judgments about the trade-offs that are involved in allocation decisions. Addressing that knowledge gap, Science under Scarcity reviews, synthesizes, and extends such methods as economic surplus analysis, econometric techniques, mathematical programming procedures, and scoring models. It discusses these practices in the context of scientific policy, describes their conceptual foundations, and explains how to do them."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The basic object of this book is to provide materials on Economic Growth, Development and Planning, in their varied

dimensions, in an easily comprehensible and lucid manner. The book is concerned mainly with the four basic constituents of Development Economics, namely, (i) Theories of Development and Underdevelopment, (ii) Theories and Models of Economic Growth, (iii) Theories of Economic planning, and (iv) Indian Planning and Development. The book is based on the syllabi of Development Economics as followed in different Standard Universities. It also covers the syllabi of competitive exams for the paper on Development, Growth and Planning. The book provides up-to-date information in terms of theories and data on the subject. B.N. Ghosh, PhD (India), M.CIM (UK), GFCR (Harvard), is currently a Professor of Economics, Eastern Mediterranean University, North Cyprus. A specialist in Human resource Development and Political Economy, he has published extensively in refereed journals. His books are published, among others, by Arnold Heinemann, Longman, Macmillan, Routledge, Nova Science Publications of New York, Ashgate Publishing and Wisdom House of England. He has undertaken short-term consultancies for various organizations including the University Grants Commission and the United Nations Development Programme. Professor Ghosh is the Director (Hon.) of the Centre for the Study of Human Development in Leeds (England), and the Editor of International Journal of Human Development, Leeds (England). Professor Ghosh's research has ranged over a number of areas including political economy, human resource development, economics, sociology, and anthropology. Some of his recent publications include: *Global Financial Crises and Reforms* (ed.), (Routledge, London and New York, 2001); *Privatisation: The ASEAN Connection* (Nova Science Publications, New York, 2000); *Gandhian Political Economy* (Ashgate Publishing, London, 2006); *Contemporary Issues in Development Economics* (Routledge, London and New York); *Economic Theories: Past and Present* (Wisdom House, England, 2001); *Contemporary Issues in Modern Macroeconomic Management* (Wisdom House, England, 2005) and *Globalization and the Third World* (co-ed.), (Macmillan, London and New York, 2006). Professor Ghosh is the recipient of the Emerald Award (UK) for 2005.

The MznLnx Exam Prep series is designed to help you pass your exams. Editors at MznLnx review your textbooks and then prepare these practice exams to help you master the textbook material. Unlike study guides, workbooks, and practice tests provided by the textbook publisher and textbook authors, MznLnx gives you all of the material in each chapter in exam form, not just samples, so you can be sure to nail your exam.

*Local Government Economics* progresses on from the author's earlier book, *Public Sector Economics*, addressing many of the same themes but at a more advanced level, and specifically within the context of local government. Suitable for both UK and international readerships, it reflects the multidisciplinary nature of local government and is aimed at final year and postgraduate students on economic or multidisciplinary degrees.
