topic - and you can check your answers online - Exam tips explain how to approach each kind of sample question and help you avoid the most common mistakes people make in their exams - For each topic there are also quick quizzes online at www.hodderplus.co.uk/myrevisionnotes It covers the most popular content from the specification: For the development study - Medicine through time For the depth studies - The American West 1840-1895 and Germany c1919-1945

This book focuses on the role of ethics in the application of mindfulness-based interventions (MBIs) and mindfulness-based programs (MBPs) in clinical practice. The book offers an overview of the role of ethics in the cultivation of mindfulness and explores the way in which ethics have been embedded in the curriculum of MBIs and MBPs. Chapters review current training processes and examines the issues around incorporating ethics into MBIs and MBPs detailed for non-secular audiences, including training clinicians, developing program curriculum, and dealing with specific client populations. Chapters also examine new, second-generation MBIs and MBPs, the result of the call for more advanced mindfulness-based practices . The book addresses the increasing popularity of mindfulness in therapeutic interventions, but stresses that it remains a new treatment methodology and in order to achieve best practice status, mindfulness interventions must offer a clear understanding of their potential and limits. Topics featured in this book include: • Transparency in mindfulness programs. • Teaching ethics and mindfulness to physicians and healthcare professionals. • The

Mindfulness-Based Symptom Management (MBSM) program and its use in treating mental health issues. • The efficacy and ethical considerations of teaching mindfulness in businesses. • The Mindful Self-Compassion (MSC) Program. • The application of mindfulness in the military context. Practitioner's Guide to Mindfulness and Ethics is a must-have resource for clinical psychologists and affiliated medical, and mental health professionals, including specialists in complementary and alternative medicine and psychiatry. Social workers considering or already using mindfulness in practice will also find it highly useful.

The revised edition of the highly successful first edition, which has established itself as the student reference guide for student teachers of history.

This core pupil's book for all abilities is part of a series written by teachers and SHP examiners that is designed to meet the requirements of the revised GCSE syllabuses. Each book in the series provides a source-based active learning approach, and some of the units are approached through asking key questions, or focusing on important issues or controversies. At the end of each unit in the pupil's book, there is an exam practice section that provides questions which cover the assessment objectives outlined in the GCSE syllabus. There are also summary boxes to aid revision.

GCSE History is designed with a similar approach and methodology as the very successful Folens KS3 History series. Each textbook has additional material available on CD-ROM. The GCSE exam content is delivered through fun stories,

Where To Download Gcse History Medicine Through Time Revision Notes

entertaining material and unusual and interesting topics.

This book describes and exemplifies strategies for teaching history across the 11-19 age range in rigorous and enjoyable ways. It illustrates active learning approaches embedded in pupil-led enquiries, through detailed case studies which involve students in planning and carrying out historical enquiries, creating accounts and presenting them to audiences, in ways that develop increasingly sophisticated historical thinking. The case studies took place in a number of different localities and show how practising teachers worked with pupils during each year from Y6/7 to Y 13 to initiate, plan and implement enquiries and to present their findings in a variety of ways. Each case study is a practical example which teachers can use as a model and modify for their own contexts, showing how independent learning linked to group collaboration and peer assessment can enhance learning. Social constructivist theories of learning applied to historical thinking underpin the book, with particular emphasis on links between personalised and collaborative learning and e-learning.

Written and edited by senior examiners, this revision guide is intended for the students of AQA GCSE specification A and is designed to help them prepare for their exams. Its coverage includes discrete overviews of the compulsory Public Health in Britain section of the specification with associated questions.

This book covers the 'Medicine in Britain, c1250-present' thematic study and the associated historic environment: 'The British sector of the Western Front, 1914-18: injuries, treatment and the trenches'. Supporting great history teaching: developing confident, articulate and successful historians. Our new resources* include 16 Student Books - one for every option in the Edexcel GCSE (9-1) History specification - for first teaching from September 2016.

Are you doing GCSE German writing or speaking exams? If so, this is the book for you. The essays are varied, interesting, and often quite advanced - to impress examiners and teachers alike. The content is different and unique, which can help to set you apart from other candidates, and ensure you score higher marks. The sentences used are much better than dull textbook phrases that all pupils will normally use. Throughout, I shall provide a German essay on a common topic, and then an English translation of that text. This book contains an essay on the following topics: health, school, family, and holidays. This title has been written specifically for the new AQA Schools History Project specification A. It includes core coverage of major issues and topics featured in the medicine through time development study - from ancient civilizations to the present day. Politics is about everyone. Even if you are not a politician, you cannot even vote or participate in elections. From what time do you have to arrive at school every day? What is a crime? What can we do to avoid war? Which countries should we cooperate with... These are all politics! We need to think about and discuss politics frequently in order to know more about the world, for example: How was the United States born? How did ancient Rome and China manage society? Why are elections and voting important? When did capitalism and communism appear?
