The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the verybeginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good

to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

Many of us love books while reading them and maybe they will echo with us a few weeks after but 2 years later we can't remember if we have read it or not. And that's a shame. We remember that at that time, the book meant a lot to us. Why is it that 2 years later we have forgotten everything? That's not good. This summary is taken from the most important themes of the original book. Most people don't like books. People just want to know what the book says they have to do. If you trust the source you don't need the arguments. So much of a book is arguing its points, but often you don't need the argument if you trust the source you can just get the point. This summary takes the effort to distill the blahs into themes for the people who are just not going to read the whole book. All this information is in the original book.

"I expected good, but this is great." -Janet Pirus Phelps, Principle, Strategic CFO, Former CFO Papa Murphy's Pizza Gaps . . . holes in your organization where tasks fall and failure breeds. They inhibit your ability to implement strategic plans, lead people, and run successful projects. Daily, executives, middle managers, and project managers wrestle with "the big six": Absence of common understanding Disengaged executive sponsors Misalignment with goals Poor change management Ineffective governance Lackluster leadership Ignoring any of these gaps will hex any strategy or project. They regularly destroy hundreds of companies' ability to turn their corporate vision into business value—taking careers with them. Filling Execution Gaps addresses the sources of these gaps, and how to fill them. Without any one of these important functions, projects fail. Without change management, adoption suffers. Without common understanding,

there is confusion. Without goals, business units, and capabilities aligned, execution falters. Without executive sponsorship, decisions languish. Too little governance allows bad things to happen, while too much governance creates overburdening bureaucracy. Without leadership at all levels of the organization, people are directionless. Using decades of experience, years of research, and interviews with hundreds of business leaders, Todd Williams illustrates how to fill these gaps, meet corporate goals, and increase value.
