on a new purchase. It's no secret we do things we know we shouldn't. It is not uncommon to come across people who do jobs that have nothing to do with their academic degrees. What ultraviolet light does to the skin to cause sunburn? What caffeine does to your brain? It is not yet clear what exactly this software did. Work was done according to the rules. He has done an obligation to me.

The Akimel O'odham, or Pima Indians, of the northern Sonoran Desert continue to make their home along Arizona's Gila River despite the alarming degradation of their habitat that has occurred over the past century. The oldest living Pimas can recall a lush riparian ecosystem and still recite more than two hundred names for plants in their environment, but they are the last generation who grew up subsisting on cultivated native crops or wild-foraged plants. Ethnobiologist Amadeo M. Rea has written the first complete ethnobotany of the Gila River Pima and has done so from the perspective of the Pimas themselves. At the Desert's Green Edge weaves the Pima view of the plants found in their environment with memories of their own history and culture, creating a monumental testament to their traditions and way of life. Rea first discusses the Piman people, environment, and language, then proceeds to share their botanical knowledge in entries for 240 plants that systematically cover information on economic botany, folk taxonomy, and linguistics. The entries are organized according to Pima life-form categories such as plants growing in water, eaten greens, and planted fruit trees. All are anecdotal, conveying the author's long personal involvement with the Pimas, whether teaching in their schools or learning from them in conversations and interviews. At the Desert's Green Edge is an archive of otherwise unavailable plant lore that will become a benchmark for botanists and anthropologists. Enhanced by more than one hundred brush paintings of plants,

it is written to be equally useful to nonspecialists so that the Pimas themselves can turn to it as a resource regarding their former lifeways. More than an encyclopedia of facts, it is the Pimas' own story, a witness to a changing way of life in the Sonoran Desert.

Born in 1914, Dorathy V. Fry became in due time the greatest female produced by the Pennsylvania German culture. She was raised in the dialect-speaking home of her grandparents, which enabled her to speak knowingly of daily life on a PA German farm. She earned her teaching degree from Millersville State Normal School and later taught at Fairview, Fetter's Clay, and Ephrata Schools in Lancaster Co., Pa. She was a major contributor to the publication "Pennsylvania German Words in Context." The author regularly visited with Dot Fry and Dot would tell stories about her life; these taped interviews have been transcribed in this volume. The stories are printed in PA Dutch and English. (415pp. color illus. Center for PA German Studies, 2014.)

Every myth is real. Every legend is true. The answers lie ... beyond the riftgate. But Jane Baker doesn't want answers, she wants ice-cream. She doesn't want friends or adventures, she wants to be alone. She doesn't want to be the most hunted person in a parallel world, or caught in a twisting web of secrets and treachery, but then again, when has Jane ever got what she wanted? Never, that's when. Now, thrown together with a bizarre assortment of allies, Jane must nurture a strength within herself that she never knew existed. For the fate of a world has come to rest on her shoulders, and saving it will require more than epic quests and deadly conflict, it will require her to confront a lie that has defined her life, and embrace a truth that will shake the

foundations of the universe...

Not all people died. Not all gave up hope. The outbreak was in February. By the end of November, Earth has become a hellish wasteland ravaged by the undead. Survivors from across the Atlantic seaboard took refuge on the Welsh island of Anglesey. Beset by dangers from within, they departed to establish a new refuge in Belfast. Not all of them arrived. Six took the last plane on its last flight, but crashed in France. Expecting a sprinting battle through the ruins of Belfast, they packed light. With few weapons and barely any food, their chances of survival are slim. The chances of rescue are slimmer. There was no evacuation in France. No quarantine. No rationing. But there are zombies, and there are people who believe they, alone, are the last survivors of the old-world. So begins a frantic race against the undead, through the snow and storm ravaged ruins of Northern France.

This title discusses how tunnels are built, from planning and excavation to construction to site design.

Three kingdoms. Two allies. One enemy. Three priests. A young prince and a princess in love. A warrior. A teacher with wisdom like nothing before. Yodha – The Dawn of the Warrior is a tale of love, betrayal, conspiracy, war and a quest for the truth. Two kingdoms have brokered a rather strong sense of peace to unite them – but all of a sudden, a seed of conspiracy is sown, and the peace between the nations is shaken up. A challenge to save love and a fight for supremacy. Will there be dawn of a new

warrior, a new Yodha?

Learn how zoos are built and what sorts of things zoo builders need to think of before construction begins.

Packed with exciting facts and important aspects on military ships, this title also provides historical context, compelling photos, primary source quotations, and critical thinking activities. The title also includes a glossary, web links, and additional resources. Aligned to Common Core Standards and correlated to state standards. Core Library is an imprint of Abdo Publishing, a division of ABDO.

This title discusses how airports are built, from runway design and construction to terminal and security.

NOTHING LIKE IT IN THE WORLD is the story of the men who built the transcontinental railroad – the investors who risked their businesses and money; the enlightened politicians who understood its importance; the engineers and surveyors who risked, and sometimes lost, their lives; and the Irish and Chinese immigrants, the defeated Confederate soldiers, and the other labourers who did the backbreaking and dangerous work on the tracks. The US government pitted two companies – the Union Pacific and the Central Pacific Railroads – against each other in a race for funding, encouraging speed over caution. Locomotives, rails and spikes were shipped from the East through Panama or around South America to the West, or lugged across the country to the Plains. In Ambrose's hands, this enterprise, with its huge expenditure of

brainpower, muscle and sweat, comes vibrantly to life.

This title discusses how roads are built, from road design and construction to painting and lighting

Find out how lighthouses work and how they have changed throughout history.

### How Did They Build That? TunnelCherry Lake

As primary subjects are increasingly being taught on an interdisciplinary level, Russell Grigg and Sioned Hughes have created an innovative new text, *Teaching Primary Humanities*. This new text explores current debate, encourages reflection and provides clear guidance on planning, teaching and assessing the humanities from the Early Years to Key Stage 2. Through a blend of theory and real-life examples, Grigg and Hughes demonstrate the contribution that history, geography and religious education can make to enhancing children's thinking, literacy, numeracy and ICT skills. Whether you are a trainee or a practitioner, this book will develop your knowledge of how young children's understanding of place, time and community can be fostered through a play-based curriculum. It will also benefit teachers of older children looking to encourage more independent learning in their schools. About the authors: Dr Russell Grigg is Head of the South West Wales Centre of Teacher Education. He is a trained primary inspector for England and Wales. He has written widely in the field of history and primary education including *Wales in the Victorian Age* and *Becoming an Outstanding Primary Teacher*. Dr Sioned Hughes is Senior Lecturer in Initial Teacher Training at the

Examines the nature of rhetorical theory and criticism, the rhetoric of science, and the impact of poststructuralism and postmodernism on contemporary accounts of rhetoric.

This title discusses how bridges are built, including engineering, design and construction.

The dungeon was always that dark place beneath us. We prefer to not enter there for the very purpose it serves. We prefer to remain above in our understanding, appreciation, our loves, and we deem that to be living. But isn't below merely the result of what we do above? We remove it from the light and cast it into that darkness so it is unseen, so it seems. It's there festering and filling up, but we can't seal it because we need it-so it seems. Perhaps the real dungeon is right where we are-just as cold and dark? It is this that we need to light up to understand what must be purged and what must be salvaged. And what is salvagable, God has made, and what must be purged, man has fostered. Scott Koch hails from Phoenixville, Pennsylvania. Although he was a technical school graduate with honors, he never found any of those fields to be inspirational, even though his skills are diverse. He grew up in a neighborhood with an older brother and a younger sister and brother, and was packed with kids.

He considers himself a "spoiled poor kid" because of this and the fact that it wasn't far to get to a field, woods, or a creek or river. Of course, the fields and woods are gone now so others may have quite a different childhood. Our author was always drawn to the abstract, or the not so evident, but would also express that Van Gogh merely had his grandchild do his paintings because he could do no less. Scott now resides in Pottstown, PA with his wife, Trudy. Scott B. Koch This title discusses how schools are built, including engineering, design and construction.

"A piece of wood, two trucks, four wheels...a skateboard. You start by rolling down a sidewalk, and end up rolling through life. For some the ride stops at the end of the street; for others the ride never ends. This book was written by those for whom the ride is never-ending: by the 15-year-old grom who falls asleep dreaming of skateboarding; by the 40-something "pad dad" you see at the local skatepark; by the women whose stories have never been told; and by the 73-year-old architect who didn't begin skateboarding until the age of 65. Over 170 stories and 200+ photographs. The 'everyman/everywoman' are accompanied by contributions from some 'notable' skateboarders, and other personalities from the skateboard world... Some of the great skateboarding photographers have graciously contributed to the book."--Description from [www.amazon.com](http://www.amazon.com)

For a lot of people, one of their first questions when they visit a great historic building is 'How the heck did they build that all that time ago? How did they manage to lift all that stone and wood up to such a great height?' In Fred Dibnah's *Buildings of Britain* we get Fred Dibnah's own distinctive answer to this question, as he takes us to some of the country's most famous and historic monuments, castles, cathedrals, abbeys, great houses and engineering marvels. One of Fred's great passions was architecture, engineering and the craft skills of builders, carpenters, stonemasons and structural engineers. His interest was not in architectural theory but in the practicalities of how things were built and with the help of his beautifully executed drawings he was very good at giving simple, vivid explanations of how things like great medieval castles and abbeys were built at a time when technology was limited and there were no power tools, no concrete, no steel, no engines and no heavy machinery. From Peterborough Cathedral to St Paul's and from the Humber Bridge to the Blackpool Tower, the book will take us on a tour of Britain's great historic buildings with a very unique and charismatic guide - Fred Dibnah.

In this thrilling conclusion to the award-winning trilogy, Charity and her friends must help Aidan defend the fortress against a militia led by Aidan's "disenfranchised" human half-siblings who want only one thing: the power of the Klaas. Everything is on the line as Charity must venture into a terrifying world called The Withering to find someone named "Perchta," their last hope for help. But will Charity survive the strange creatures and even more shocking truth that await her?

This title discusses how dams are built, including engineering, design and construction. From an early age, kids love to build things. This engaging series will capture the attention of
