

Imaginative Writing The Elements Of Craft Janet Burroway

The creative writing workshop: beloved by some, dreaded by others, and ubiquitous in writing programs across the nation. For decades, the workshop has been entrenched as the primary pedagogy of creative writing. In *Creative Writing Pedagogies for the Twenty-First Century*, editors Alexandria Peary and Tom C. Hunley gather together contributing experts from both creative writing and composition studies--a discipline rich with a wide range of established pedagogies-- to offer innovative alternatives to the traditional creative writing workshop. Contributors in this volume present fresh and inventive methods for the teaching of creative writing. Each chapter offers both a theoretical and a historical background for its respective pedagogical ideas, as well as practical applications for use in the classroom. This myriad of methods can be used either to supplement the customary workshop model or as stand-alone roadmaps to engage and reinvigorate the creative process for both students and teachers alike.

"I have a faith in language," said the poet W. S. Merwin. "It's the ultimate achievement that we as a species have evolved so far." Language is a deep ocean of living words, as varied as undersea life. It is a gift inherited by each person when he or she is born; it can be corrupted and regulated, but it cannot be owned. It is an enormous, complex, inexhaustible gift. *The Soul of Creative Writing* is a tribute to language and to its potentials. It explores the elements of language, style, rhythm, sound, and the choice of the right word. Richard Goodman paints an image of how language can produce a life and meaning that otherwise cannot exist in the symbols themselves. Goodman's stunningly creative collection was written after a lifetime of working and struggling with language. He collects rich examples from writers of the past and present, both great and small, and uses them to illustrate how each element of our written language can be used. The book begins with an analysis of words and how they can be used to create music on the page. Goodman uncovers the strength of words, writing about the shades of meaning that make the search for the exact word both arduous and immensely rewarding. He discusses how to find the proper title and how to find a fitting subject. He shows how to create nonfiction work that is vivid and memorable through the use of the same techniques fiction writers employ. Goodman's volume is written with humor and clarity--with fascination and reverence. Writers will find it an indispensable source of creative inspiration and instruction. In Goodman's words, "reading is a tour of a writer's efforts at manipulating language to create art, to create flesh and blood and mountains, cities, homes, and gardens out of inky symbols on the page." To literary critics, this book will be a guide to understanding the tools and devices of great writing.

For anyone who desires to become an author, two classic books share the necessary elements of creative writing and the habits and processes to make your writing successful. Professor William Strunk published *Elements of Style* at the end of the First World War. This book inspires us to write well while immersing readers in the atmosphere of a gentlemen's writing circle where we can almost smell the chalk and tweed. The professor encourages the writer to write well, if for no other reason than to escape his stern reprimand. *If You Want to Write* is Brenda Ueland's classic exploration of the essence and art of literary creativity. She believed that only by expressing one's creative spirit can we become "generous, joyful, lively, bold and sympathetic". William Strunk: *The Elements of Style* Brenda Ueland: *If You Want to Write*

This book ... describes how universal writing problems have been dealt with by experienced writers, and it explains how the mistakes commonly made by novice writers can be avoided. The book is organized to be as practical as possible. It outlines the general principles of writing and then moves on to specific problems that writers encounter. Chapters 1-4 discuss the fundamental elements in a piece of creative writing--theme, setting, characters, and plot. Chapters 5-11 deal with the basic techniques for handling point of view, tone, description, dialogue, time, and imagery. Chapters 12 and 13 go over the mechanics of manuscript preparation and present a brief review of grammar, punctuation, and spelling. Finally, Chapter 14 looks at writing as a career and offers suggestions on such things as marketing, inquiries, and agents. (Cont. in TofC).

Creative writing is a responsive human activity. We use it to respond to the world, to our feelings, to ideas, to observations, to other people, to historical and cultural events, and to the wonders created in our imaginations. This book shows how we go about doing this responding. Contributors discuss practice-led research in creative writing. They look at the ways a writer can use language or employ genre and consider how we each define themes and subjects and use writing techniques to explore these themes and subjects. In examining creative writing teaching, the contributions gathered here suggest that teaching can be more responsive, more engaged with student interests, and more successful. This book shows that exploring creative writing, through a variety of means, can produce inventive, energetic results that can improve our own creative writing, as well as substantially contribute to our critical understanding of creative writing.

Using the author's own experiences in addition to a survey of 150 creative writing teachers, this book critiques the creative writing workshop and suggests a possible replacement that 'unsilences' the writer and recognises the complexities of the student-teacher relationship by focussing on dialogue rather than criticism.
