five parts: (1) Information and Methodology for Financial Analysis; (2) Alternative Finance Theories and Cost of Capital; (3) Capital Budgeting and Leasing Decisions; (4) Corporate Policies and their Interrelationships; (5) Financial Planning and Forecasting. The theories used and discussed in this book can be grouped into the following classical theoretical areas of corporate finance: (1) Pre-M&M Theory, (2) M&M Theory, (3) CAPM, and (4) Option Pricing Theory (OPT). The interrelationships among these theories are carefully analyzed. Real world examples are used to enrich the learning experience; and alternative planning and forecasting models are used to show how the interdisciplinary approach can be used to make meaningful financial-management decisions. In this third edition, we have extensively updated and expanded the topics of financial analysis, planning and forecasting. New chapters were added, and some chapters combined to present a holistic view of the subject and much of the data revised and updated.

Provides authoritative definitions written by practitioners or researchers for more than 2,600 terms used in educational research, practice, and theory.

"Emilia Pardo Bazán (1851-1921) was the most prolific and influential woman writer of late nineteenth-century Spain," write the editors of this volume in the MLA's Approaches to Teaching World Literature series. Contending with the critical literary, cultural, and social issues of the period, Pardo Bazán's novels, novellas, short stories, essays, plays, travel writing, and cookbooks offer instructors countless opportunities to engage with a variety of critical frameworks. The wide range of topics in the author's works, from fashion to science and technology to gender equality, and the brilliance of her literary style make Pardo Bazán a compelling figure in the classroom. Part 1, "Materials," provides biographical and critical resources, an overview of Pardo Bazán's vast and diverse oeuvre, and a literary-historical time line. It also reviews secondary sources, editions and translations, and digital resources. The twenty-three essays in part 2, "Approaches," explore various issues that are central to teaching Pardo Bazán's works, including the author's engagement with contemporary literary movements, feminism and gender, nation and the late Spanish empire, Spanish and Galician identities, and nineteenth-century scientific and medical discourses. Film adaptations and translations of Pardo Bazán's works are also addressed. Highlighting the artistic, social, and intellectual currents of Pardo Bazán's writings, this volume will assist instructors who wish to teach the author's works in courses on world literature, nineteenth-century literature, and gender studies as well as in Spanish-language courses.

Reconnecting the Church is offered as a practical guide to assist pastors and laypeople

in understanding the city, engaging, and serving the local community in which the church is located. The book's purpose is to come along side the local church that wishes to reconnect to its local community, and offer practical ways to accomplish that task. There are 25 chapters each of which describes briefly an aspect of life in the city. At the end of each chapter are practical action/reflection projects. These projects are designed to give the reader first-hand experience of their church's immediate neighborhood. They are specific tasks, most of which will be done outside the church. Each action is described, and guidance is given for reflection after each project.

A classic work in political philosophy, intellectual history and economics, *The Road to Serfdom* has inspired and infuriated politicians and scholars for half a century. Originally published in 1944, it was seen as heretical for its passionate warning against the dangers of state control over the means of production. For Hayek, the collectivist idea of empowering government with increasing economic control would lead not to a utopia but to the horrors of Nazi Germany and Fascist Italy. This new edition includes a foreword by series editor and leading Hayek scholar Bruce Caldwell explaining the book's origins and publishing history and assessing common misinterpretations of Hayek's thought. Caldwell has also standardized and corrected Hayek's references and added helpful new explanatory notes. Supplemented with an appendix of related materials and forewords to earlier editions by the likes of Milton Friedman, and Hayek himself, this new edition of *The Road to Serfdom* will be the definitive version of Friedrich Hayek's enduring masterwork.

This widely adopted text starts with the fundamentals--what is economic growth, what is development, and what is the relationship between these two concepts? The authors examine orthodox theories of growth grounded in different schools of economics (classical, neoclassical, Keynesian, neoliberal) before considering critical alternatives (Marxist, socialist, poststructuralist, and feminist). The book elucidates the basic ideas that underpin

contemporary controversies and debates surrounding economic growth, environmental crisis, and global inequality. It highlights points of contention among the various theories and links them to historical and current world events. New to This Edition *Reflects the latest data and global development trends, such as the effects on economies of extreme weather events and climate change. *New discussions throughout the chapters, including the work of Thomas Piketty, Richard Florida, William Easterly, Niall Ferguson, and Arturo Escobar. *Responds to current crises, including the global financial meltdown and its consequences and the rise of finance capitalism.

The Dynamics of Interconnections in Popular Culture(s) is an eclectic and free-ranging collection of articles grounded in a combination of the social sciences with the populist humanities. The collection is further unified by an approach that considers changes and linkages within and between cultural systems as evidenced through their respective popular cultures. The key underlying assumption is that our collective popular expressions create an arena of global cultural exchange, further precipitating new cultural adaptations, expressions, and connections. The volume is divided into two sections. The first consists of articles investigating theoretical and methodological approaches to the dynamics of history and cultural changes. These include cultural anthropology, history, economics, and sociology. The second section is made up of explorations into a myriad of cultural practices and expressions that exemplify not only the wide diversity of popular cultures and their workings, but also the interconnections between and within those cultural systems. A wide variety of specific case studies are presented to evidence and support the more general points made in the previous section. The collection demonstrates that the everyday lives of ordinary people, while varying

from culture to culture, are unified through their expressions of shared humanity. Foreword by Gary Hoppenstand.

The perfect resource for both practicing professionals and students in CRNA programs!

The rapid evolution of Charlotte, North Carolina, from “regional backwater” to globally ascendant city provides stark contrasts of then and now. Once a regional manufacturing and textile center, Charlotte stands today as one of the nation’s premier banking and financial cores with interests reaching broadly into global markets. Once defined by its biracial and bicultural character, Charlotte is now an emerging immigrant gateway drawing newcomers from Latin America and across the globe. Once derided for its sleepy, nine-to-five “uptown,” Charlotte’s center city has been wholly transformed by residential gentrification, corporate

headquarters construction, and amenity-based redevelopment. And yet, despite its rapid transformation, Charlotte remains distinctively southern—globalizing, not yet global. This book brings together an interdisciplinary team of leading scholars and local experts to examine Charlotte from multiple angles. Their topics include the banking industry, gentrification, boosterism, architecture, city planning, transit, public schools, NASCAR, and the African American and Latino communities. United in the conviction that the experience of this Sunbelt city—center of the nation’s fifth-largest metropolitan area—offers new insight into today’s most pressing urban and suburban issues, the contributors to *Charlotte, NC: The Global Evolution of a New South City* ask what happens when the external forces of globalization combine with a city’s internal dynamics to reshape the local structures, landscapes, and identities of a southern place.

In a time of uncertainty and change in the newspaper industry, this book provides a concise and thorough overview of the field, looking back at newspapers' history, and forward to their future - and insisting there will be one. The authors, former journalists who now teach the subject, review the practices of the profession - from defining news to examining who owns newspapers, from newspaper readership to the new media environment. Written in an accessible style, this comprehensive text is well suited for a range of courses on newspapers. A substantially revised edition of a bestselling text combining explanation and implementation using Excel; for classroom use or as a reference for finance practitioners. *Financial Modeling* is now the standard text for explaining the implementation of financial models in Excel. This long-awaited fourth edition maintains the “cookbook” features and Excel dependence that have made the previous editions so popular. As in previous editions, basic and advanced models in

the areas of corporate finance, portfolio management, options, and bonds are explained with detailed Excel spreadsheets. Sections on technical aspects of Excel and on the use of Visual Basic for Applications (VBA) round out the book to make Financial Modeling a complete guide for the financial modeler. The new edition of Financial Modeling includes a number of innovations. A new section explains the principles of Monte Carlo methods and their application to portfolio management and exotic option valuation. A new chapter discusses term structure modeling, with special emphasis on the Nelson-Siegel model. The discussion of corporate valuation using pro forma models has been rounded out with the introduction of a new, simple model for corporate valuation based on accounting data and a minimal number of valuation parameters. New print copies of this book include a card affixed to the inside back cover with a unique access code. The Salem Witch Trials is based on over twenty-five years of archival research--including the author's discovery of previously unknown documents--newly found cases and court records. From January 1692 to January 1697 this history unfolds a nearly day-by-day narrative of the crisis as the citizens of New England experienced it.

This second edition of an Artech House classic title describes in detail the relationship between radiometry and photometry. It covers information needed to solve problems in radiation transfer and detection, detectors, measuring instruments, and concepts in colorimetry. This revised second edition presents an updated treatment of modern radiometry and photometry, including brand new sections on applications and developments in light sources and scientific instruments for measuring radiation and light. Engineers are also provided with an exciting new chapter on the use of computerized optical ray tracing for “virtual” experiments on optical systems.

Not long ago, most blind and visually impaired people grew up without ever playing sports; they sat on the sidelines, and kept score during gym—protected rather than included. In the 1980s, few people had ever heard of the Paralympic Games or accessible recreation. Today, promising blind athletes can receive residency at the US

Olympic Training Center; runners compete for prize money and national championships, and most ski resorts offer adaptive programs throughout the year where blind people can ski, cycle, and kayak—often for free. The Paralympic movement, the Americans with Disabilities Act of 1990, and ever-increasing expectation for inclusion among the disabled have inspired an explosion of accessible sports, fitness, and recreation programs that accommodate the blind. The Encyclopedia of Sports & Recreation for People with Visual Impairments is the first consumer-focused, action-oriented guide to this new world of accessible activity, profiling the people, programs, and products that are helping move blind and visually impaired people from the sidelines into the game. This groundbreaking guide profiles every accessible blind sport and recreation activity with entries that outline how athletes (both novice and elite) got involved in the sport and how participation has shaped their life. The book also profiles major blind sports organizations and includes chapter and resource listings on camps and accessible recreation providers. Through this book, blind people will be inspired to embrace sports as the rest of society does—as a vital component of personal expression and human interaction that opens paths to adventure, confidence, and lifelong health and fitness.
