This pathbreaking work uses the approaching conclusion of the second millennium as a context for discussing questions concerning temporal division and narrative continuity. It investigates assumptions about teleology and eschatology while exploring the ways in which temporal division affects the creation and production of cultural texts and, reciprocally, the ways in which narrative techniques, forms, and conventions shape, explain, and justify history. Through this exploration, the volume examines how temporal thresholds tend simultaneously to reinforce and to disrupt conceptual boundaries. The sixteen essays use the significance typically invested in historical junctures marked by a centenary advance to investigate perceived paradigm shifts and the consequent reactions to these implicit and explicit transitions. By doing so, they also seek to illuminate the relations between narrative and history, and to enhance understanding of our present historical moment.

Ministry With the Aging--the one most frequently used textbook in seminary courses that deal with ministry and aging--is now available from The Haworth Press. Here is a genuinely useful and informative text in which an all-star cast of authors reflects on the current situation of the aged in our society. Ministry With the Aging encourages a deeper appreciation of the presence and role of aging people with contemporary religion, addresses the challenges that the church and society face in a rapidly

aging society, and provides practical applications for an effective ministry with the aging. Each chapter, whether it focuses on the role of the elderly in the early church, death and dying, ageism, retirement, or caring for elderly parents, is written by an eminent scholar who has chosen only the most relevant issues for discussion. A past runner up for the "Book of the Year Award" by the Academy of Parish Clergy, *Ministry With the Aging* is a landmark volume that can offer theology students a unique and insightful look at how they can best meet the needs of their elderly parishioners.

The first study to focus exclusively on the baby in nineteenth-century literature and culture. Drawing on novels by writers such as Charles Dickens, Wilkie Collins, Mary Elizabeth Braddon, as well as parenting magazines and manuals, it analyses how representations of infancy shaped an iconography that has defined the Victorian age.

As an inchoate middle class emerged in Puerto Rico in the early nineteenth century, its members sought to control not only public space, but also the people, activities, and even attitudes that filled it. Their instruments were the San Juan town council and the Casa de Beneficencia, a state-run charitable establishment charged with responsibility for the poor. In this book, Teresita Martínez-Vergne explores how municipal officials and the Casa de Beneficencia shaped the discourse on public and private space and thereby marginalized the worthy poor and vagrants, "liberated" Africans, indigent and unruly women, and destitute children. Drawing on extensive and innovative archival

research, she shows that the men who comprised the San Juan ayuntamiento and the board of charity regulated the public discourse on topics such as education, religious orthodoxy, hygiene, and family life, thereby establishing norms for "correct" social behavior and chastising the "deviant" lifestyles of the working poor. This research clarifies the ways in which San Juan's middle class defined itself in the midst of rapid social and economic change. It also offers new insights into notions of citizenship and the process of nation-building in the Caribbean.

During the Progressive Era, a rehabilitative agenda took hold of American juvenile justice, materializing as a citizen-and-state-building project and mirroring the unequal racial politics of American democracy itself. Alongside this liberal "manufactory of citizens," a parallel structure was enacted: a Jim Crow juvenile justice system that endured across the nation for most of the twentieth century. In *The Black Child Savers*, the first study of the rise and fall of Jim Crow juvenile justice, Geoff Ward examines the origins and organization of this separate and unequal juvenile justice system. Ward explores how generations of "black child-savers" mobilized to challenge the threat to black youth and community interests and how this struggle grew aligned with a wider civil rights movement, eventually forcing the formal integration of American juvenile justice. Ward's book reveals nearly a century of struggle to build a more democratic model of juvenile justice—an effort that succeeded in part, but ultimately failed to deliver black youth and community to liberal rehabilitative ideals. once an inspiring story about the shifting boundaries of race, citizenship, and democracy in America and a crucial look at the nature of racial inequality, *The Black Child Savers* is a stirring account of the stakes and meaning of social justice.

Conversing on Gender is, as its subtitle indicates, a primer for entering the broad conversation on gender that can be found both inside and outside of academic circles. The book considers the relation of gender to sex and sexuality, reviews prominent theories of gender, and covers basic gender issues.

This book investigates the relationship between ideas about childhood and the actual experience of being a child, and assesses how it has changed over the span of five hundred years. Hugh Cunningham tells an engaging story of the development of ideas about childhood from the Renaissance to the present, taking in Locke, Rousseau, Wordsworth and Freud, revealing considerable differences in the way western societies have understood and valued childhood over time. His survey of parent/child relationships uncovers evidence of parental love, care and, in the frequent cases of child death, grief throughout the period, concluding that there was as much continuity as change in the actual relations of children and adults across these five centuries. In this lively and accessible book, Colin Heywood explores the changing experiences and perceptions of childhood from the early Middle Ages to the beginning of the twentieth century. Heywood examines the different ways in which people have thought about childhood as a stage of life, the relationships of children with their families and peers, and the experiences of young people at work, in school and at the hands of various welfare institutions. The aim is to place the history of children and childhood firmly in its social and cultural context, without losing sight of the many individual experiences that have come down to us in diaries, autobiographies and oral testimonies. Heywood argues that there is a cruel paradox at the heart of childhood in the past. On the one hand, material conditions for children have generally improved in the West, however belatedly and unevenly, and they are now more valued than in the past. On the other hand, the business of preparing for adulthood has become more complicated in urban and industrial societies, as the young face a bewildering array of choices and expectations. *A History of Childhood* will be an essential introduction to the subject for students of history, the social sciences and cultural studies.

The Global History of Childhood Reader provides an essential collection of chapters and articles on the global history of childhood. The Reader is structured thematically so as to provide both a representative sampling of the historiography as well as an overview of the key issues of the field, such as childhood as a social construct, commonalities and differences globally, and why the twentieth century was not the "century of the child" for most of the world's children. The Reader is divided into four parts: Theories and methodologies of the history of childhood
Constructions of childhood in different times and places
Children's experiences in different times and places
Usage of the past to articulate solutions to problems facing children today. Topics covered include theories and methodologies in the global history of childhood, sources for writing a global history of childhood, education, gender, disability, race, class and religion, the individual in history and emotions, violence, labour and illiteracy. With introductions that contextualize each of the four parts and the articles, further reading sections and questions; this is the perfect guide for all students of the history of childhood.

texture of nineteenth-century US writing. This collection traces the vicissitudes of this cultural preoccupation with the subject of death and examines how mortality served paradoxically as a site on which identity and subjectivity were productively rethought. Contributors from North America and the United Kingdom, representing the fields of literature, theatre history, and American studies, analyze the sexual, social, and epistemological boundaries implicit in nineteenth-century America's obsession with death, while also seeking to give a voice to the strategies by which these boundaries were interrogated and displaced. Topics include race- and gender-based investigations into the textual representation of death, imaginative constructions and reconstructions of social practice with regard to loss and memorialisation, and literary reconceptualisations of death forced by personal and national trauma.

Democratic Civility examines the core requirements necessary to make democracy work. Subtly interweaving case studies and theoretical reflection. Transcending Boundaries: Writing for a Dual Audience of Children and Adults is a collection of essays on twentieth-century authors who cross the borders between adult and children's literature and appeal to both audiences.

This collection of fourteen essays by scholars from eight countries constitutes the first book devoted to the art of crosswriting the child and adult in twentieth-century international literature. Sandra Beckett explores the multifaceted nature of crossover literature and the diverse ways in which writers cross the borders to address a dual readership of children and adults. It considers classics such as *Alice's Adventures in Wonderland* and *Pinocchio*, with particular emphasis on

post-World War II literature. The essays in *Transcending Boundaries* clearly suggest that crossover literature is a major, widespread trend that appears to be sharply on the rise.

The manuscript of *Cecilia* was submitted to Dr Burney and Mr Crisp during its composition, and their suggestions were in some cases adopted, as we learn from the *Diary*. Dr Johnson was not consulted, but a desire at once to imitate and to please him evidently controlled the work. Under these circumstances it is naturally less fresh and spontaneous than *Evelina*, but it is more mature. The touch is surer and the plot more elaborate. We cannot to-day fully appreciate the "conflict scene between mother and son," for which, Miss Burney tells us, the book was written; but the pictures of eighteenth century affectations are all alive, and the story is thoroughly absorbing, except, perhaps, in the last book. Miss Burney often took the name of her characters from her acquaintances, and it seems probable that some of the "types" in *Cecilia* are also drawn from real life. The title of Miss Austen's *Pride and Prejudice* was borrowed from *Cecilia*, and some points of resemblance may be traced between the two novels.

A compelling analysis of how "middling" Americans entertained themselves and how these entertainments changed over time. The changing styles of middle-class home entertainments, Melanie Dawson argues, point to evolving ideas of class identity in U.S. culture. Drawing from 19th- and early-20th-century fiction, guidebooks on leisure, newspaper columns, and a polemical examination of class structures, *Laboring to Play*

interrogates the ways that leisure performances (such as parlor games, charades, home dramas, and tableaux vivants) encouraged participants to test out the boundaries that were beginning to define middle-class lifestyles. From 19th-century parlor games involving grotesque physical contortions to early-20th-century recitations of an idealized past, leisure employments mediated between domestic and public spheres, individuals and class-based affiliations, and ideals of egalitarian social life and visible hierarchies based on privilege. Negotiating these paradigms, home entertainments provided their participants with unique ways of performing displays of individual ambitions within a world of polite social interaction. *Laboring to Play* deals with subjects as wide ranging as social performances, social history (etiquette and gentility), literary history, representations of childhood, and the history of the book. A challenge to the cultural tradition of corporal punishment in Black homes and its connections to racial violence in America Why do so many African Americans have such a special attachment to whupping children? Studies show that nearly 80 percent of black parents see spanking, popping, pinching, and beating as reasonable, effective ways to teach respect and to protect black children from the streets, incarceration, encounters with racism, or worse. However, the consequences of this widely accepted approach to child-rearing are far-reaching and seldom discussed. Dr. Stacey Patton's extensive research suggests that corporal punishment is a crucial factor in explaining why black folks are subject to disproportionately higher rates of school suspensions

and expulsions, criminal prosecutions, improper mental health diagnoses, child abuse cases, and foster care placements, which too often funnel abused and traumatized children into the prison system. Weaving together race, religion, history, popular culture, science, policing, psychology, and personal testimonies, Dr. Patton connects what happens at home to what happens in the streets in a way that is thought-provoking, unforgettable, and deeply sobering. Spare the Kids is not just a book. It is part of a growing national movement to provide positive, nonviolent discipline practices to those rearing, teaching, and caring for children of color. Historically, many world cultures have linked three disparate phenomena: collective loss; mourning; and the construction of monuments and cultural symbols to represent the loss over time and render it memorable, meaningful, and thereby bearable. In a century of great loss, observers of western culture have commented on the decline of mourning practices and the absence of their associated rituals. The ten essays assembled here by Peter Homans represent, in a genuinely interdisciplinary way, the recent work of scholars attempting to understand this trend. Arranged in sections on cultural studies, architecture, history, and psychology, this accessible collection can serve as an introduction to the uses of mourning in contemporary cultures. advance legislation, develop police tactics and to educate children and their carers to engage with multi-media and the internet safely. Understanding how sex offenders use the internet and how the police and the government are responding to their behaviour is central to the development of preventative measures. Based on extensive ethnographic research conducted with the police and a specialist paedophile unit, here Elena Marellozzo presents an informed analysis of online child sexual abuse: of the patterns and characteristics of online grooming, and of the challenges and techniques that characterize its policing. Connecting theory, research and practice in the field of policing, social policy, victimology and criminology, this book adds significantly to our understanding and knowledge of the problem of online child sexual abuse, the way in which victims are targeted and how this phenomenon is, and might be, policed.

American suburb examines how "the good life" in America came to be equated with the a home of one's own surrounded by a grassy yard and located far from the urban workplace. Integrating social history with economic and architectural analysis, and taking into account such factors as the availability of cheap land, inexpensive building methods, and rapid transportation, Kenneth Jackson chronicles the phenomenal growth of the American suburb from the middle of the 19th century to the present day. He treats communities in every section of the U.S. and compares American residential patterns with those of Japan and Europe. In conclusion, Jackson offers a controversial prediction: that the future of residential deconcentration will be very different from its past in both the U.S. and Europe.

This collection of essays addresses twentieth-century historical and contemporary issues regarding children who are considered to be at risk. The essays explore the language of risk as it is used by the courts, the schools, governmental agencies, and child advocates, those who discover risks and create correctives for children who both need protection and threaten to disturb the social order. The tasks require an exploration of differing, often contradictory, concepts of the child and society that are embedded in public policy debates. Deepening the complexity of the problems, institutions to which we look for solutions are too often faced with conflicts that arise when the needs of the child are at variance with the needs of the institutions themselves. These dilemmas are central to understanding our failure to achieve adequate public policy solutions for children at risk.

Like William Blake's *Songs of Innocence and Experience*, these poems evoke childhood moments from the dream-like states of infancy to the early exhilarations of nature, animals, games, school, sex, and the earliest discoveries of love. Such elusive memories are screened through the double lens of the boy's innocence and the grown man's more complex awareness. In exploring the world of the poet's personal history, *First Kingdoms* also records and celebrates a type of childhood less and less known to today's digitally-obsessed generations.

A Parliamentarian described his feelings towards Charlotte de La Trémoille when he wrote in the journal the Parliamentary Scout "three women ruined the Kingdom Eve, The Queen and the Countess of Derby". This historical biography uses the letters found in the Chateau at Thouars and preserved in the French National Archive in Paris to piece together an account of her ideas and actions. Eyewitness writings are used to describe her activities during the siege by Parliamentary forces of the Royalist Lathom House. Following the end of the siege, she was exiled to the Isle of Man. A Huguenot, Charlotte lived at a time of religious and political upheaval in both France and England. She was related by birth and marriage to European royalty and aristocracy. She was the only woman sequestered by the Parliament of Oliver Cromwell and King Charles II promised her the position of Governess to his children.

end, achieve greater recognition for any number of issues, or simply be treated with respect. Striking then, why so many universities lack programs for social activists, to which students can turn for advice and inspiration. Instead, scholarly discussions of change are fragmented with few conversations crossing disciplinary boundaries, rarely making it onto the radar of those actively seeking change. This book bridges the gap between academia and practice, bringing together the best research from a range of academic disciplines and the evolving practical understanding of activists to explore the topic of social and political change. Drawing on many first-hand examples from the global experience of Oxfam, one of the world's largest social justice NGOs, as well as the author's insights from studying and working on international development, it tests ideas on how change happens and offers the latest thinking on what works to achieve progressive change.

In 1743, sitting quietly with pen in hand, Sarah Osborn pondered how to tell the story of her life, how to make sense of both her spiritual awakening and the sudden destitution of her family. record. Catherine Brekus recovers the largely forgotten story of Sarah Osborn's life as one of the most charismatic female religious leaders of her time, while also connecting her captivating story to the rising evangelical movement in eighteenth-century America. A schoolteacher in Rhode Island, a wife, and a mother, Sarah Osborn led a remarkable revival in the 1760s that brought hundreds of people, including many slaves, to her house each week. Her extensive written record—encompassing issues ranging from the desire to be "born again" to a suspicion of capitalism—provides a unique vantage point from which to view the emergence of evangelicalism. Brekus sets Sarah Osborn's experience in the context of her revivalist era and expands our understanding of the birth of the evangelical movement—a movement that transformed Protestantism in the decades before the American Revolution.
