case studies (including Reebok, Benetton, and The Body Shop), this significant text is a valuable reference for those involved in the retail sector.

The text's logical organization around a decision-making process allows readers to learn about the process of strategic decisions first before moving on to decision implementation. The implementation decisions are broken down into merchandise management decisions and store management decisions, just as they would be in a real retailing setting. The text provides a balanced treatment of strategic, how to, and conceptual material, in a highly readable and interesting format.

This is not a traditional textbook or collection of case studies, but is intended to demonstrate the complex and manifold questions of retail management in the form of 18 lessons that provide a thematic overview of key issues and illustrate them with the help of comprehensive case studies. In the second edition, all chapters were revised and updated. Three new chapters were added to treat topics like online-retailing and multi-channel-strategies as well as the so called verticals in specific chapters. All case studies were replaced by new ones to reflect the most recent developments. Eighteen well-known retail companies from different countries, like Best Buy, IKEA, TK Maxx, Tesco and Decathlon, are now used to illustrate particular aspects of retail management.
