Regulating Drinking Water Quality examines the issue of safe drinking water from both scientific and public health policy points of view. Twenty-seven chapters provide a forum in which EPA and non-EPA scientists discuss the challenges of implementing the 1986 Safe Drinking Water Act (SDWA) amendments. General areas covered include an update on regulating lead in drinking water, radon in drinking water, regulating for microbes and disinfection by-products, exposure assessment and drinking water contamination, risk assessment and drinking water contamination, and consumer protection from drinking water point of use systems. Drinking water professionals, environmental and engineering professionals, regulatory personnel, and legislators should consider this important new book a "must have" acquisition for their libraries. Peter Schrag takes on the big issues immigration, globalization, and the impact of California's politics on its quality of life in this dynamic account of the Golden State's struggle to recapture the American dream. In the past half-century, California has been both model and anti-model for the nation and often the world, first for its high level of government and public services schools, universities, highways and latterly for its dysfunctional government, deteriorating services, and sometimes regressive public policies. "California "explains how many current "solutions" exacerbate the very problems they're supposed to solve and analyzes a variety of possible state and federal policy alternatives to restore government accountability and a vital democracy to the nation's most populous state and the world's fifth-largest economy.
