*Moments that Matter in the Learning and Development of Children: Reflections from Educators* explores the significant moments that unfold for young people in their schooling from the perspectives of teachers and school staff. Educators often reflect on “moments” as being a critical piece of their work with children. They can help make things better for students and produce a difference in lives. They are meaningful for young people, as well as consequential for teachers and school staff as they reflect on the outcomes of their efforts. Yet, as they are difficult to define and capture, these moments often are not studied for the value they offer. This book promotes awareness of these moments, as well as their connected meanings and possibilities. Recognizing the significance of moments extends an opportunity to situate schooling in broader contexts and to understand learners as whole embodied beings, engaged in social interactions, making sense of their surrounding world, and generating transformations in it. When educators reflect deeply about the possibilities connected to the moments they share with children, they recognize the multitude of opportunities that support their learning and development. They become “awake” to some of moments’ promises.

immigration and cultural diversity, amplified political divisiveness, and bullying effect their daily lives both in and out of school. These influences have contributed to the need for more socialemotional support and the desire of students and teachers alike to find and express their voices. Since the publication of the 2002 Handbook volume focusing on curriculum, instruction, and assessment, the ideas, approaches, and practices of middle school educators and researchers have also needed to evolve and change in many ways to meet these changing realities and the needs of students, teachers, and schools. This volume includes chapters focusing on varying aspects of curriculum, instruction, and assessment currently being implemented in middle grades classrooms across the country.

The profound changes that we are experiencing at the political, environmental, economic, social, and cultural levels of our “postmodern” society pose immense challenges to education. In order to empower students to analyze, reflect, and take action for a sustainable world, the learning and educational process must be experienced in the context of citizenship; that is, it must be designed, planned, and implemented having global sustainability as a framework, thus developing societal awareness, values, and principles. Teaching and Learning Practices That Promote Sustainable Development and Active Citizenship is an essential research book that provides comprehensive research on

education as a fundamental factor in empowering citizens to understand and act on the multiple risks and challenges to the sustainability of our society and world. Highlighting a range of critical learning strategies such as global and critical education, development education, and transformational education, among others, this book is ideal for academicians, education professionals, researchers, policymakers, and students.

This book provides commentary on the influence of multi-layered political contexts that surround the work of teacher educators worldwide. It addresses the drawbacks of the massification, standards-based movements and marketisation of universal business that threaten authenticity, innovation and entrepreneurship within teacher education on a global scale. The chapters celebrate the richly described local stories that explore the often tacit political activity that underpins teacher educators' work. The book highlights the commitment of both teachers and teacher educators to social justice, and human rights and critical consciousness as central to the process of teacher development. Teacher formation, teacher education policies and curriculum development in an era of globalisation, super-diversity and the positioning of Indigenous populations, and national regulation and localisation are topics that are explored in this book.

It took Julie Macfarlane a lifetime to say the words out loud – the words that finally broke the calm and traveled farther than she could have imagined. In this clear-eyed account, she confronts her own silence and deeply rooted trauma to chart a remarkable course from sexual abuse victim to agent of change. *Going Public* merges the worlds of personal and professional, activism and scholarship. Drawing upon decades of legal training, Macfarlane decodes the well-worn methods used by church, school, and state to silence survivors, from first reporting to cross-examination to non-disclosure agreements. At the same time, she lays bare the isolation and exhaustion of going public in her own life, as she takes her abuser to court, challenges her colleagues, and weathers a defamation Lawsuit. The result is far more than a memoir. It's a courageous and essential blueprint on how to go toe-to-toe with the powers behind institutional abuse and protectionism. At long last, Macfarlane's experiences bring her to the most important realization of her life: that only she can stand in her own shoes, and only she can stand up and speak about what happened to her.

teacher educators, researchers, and others who work to provide effective learning opportunities for teachers, with emphasis on describing and analysing their engagement in mathematics teacher education collaborations and contexts from various perspectives.

There are three types of teacherpreneurs: classroom, business, and consultant teacherpreneurs. Classroom teacherpreneurs inspire and motivate students to be the best they can be using outside resources, business teacherpreneurs teach students to become entrepreneurs, and consultant teacherpreneurs are usually former teachers who own a consulting business and go into schools to assist with improving academics. Each plays an important and different role within the educational system in the United States and one without the other would not assist students in gaining academic success. These individuals are the mainstay of educational systems, and without them, school systems would fail. *Enhancing Teaching and Leadership Initiatives With Teacherpreneurs: Emerging Research and Opportunities* is a critical scholarly resource that explores the characteristics and models of a teacherpreneur, their advantages and disadvantages, and examines how they can be used by current classroom teachers and school administrators to improve and enhance the teaching profession. Featuring a wide range of topics such as curriculum design, student outcomes, and ethics, this book is essential for teachers, educational consultants, school administrators, academicians, researchers, and students.

targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.
