Future growth will require that all corporations undergo... The Big Shift. This book proposes the unpopular: right size the traditional cultural silo and place multicultural consumers front and center of mainstream marketing to drive growth. The convergence of a changing demography, new technologies and a fragmented media ecosystem has transformed marketing as we know

it, yet marketing to Latinos continues to lag significantly, bound by an outdated paradigm and a total market strategy that has failed to address an increasingly diverse marketplace. This book takes a critical look at the past, present and future of marketing to Latinos and advances a strategic framework of how marketers can take their business to new heights in the 21st century.

In a radical break with the past, information now flows like water, and we must learn how to tap into its stream. Individuals and companies can no longer rely on the stocks of knowledge that they've carefully built up and stored away. Information now flows like water, and we must learn how to tap into the stream. But many of us remain stuck in old practices - practices that could undermine us as we search for success and meaning. In this revolutionary book, three doyens of the Internet age, whose path-breaking work has made headlines around the world, reveal the adjustments we must make if we take these changes seriously. In a world of increasing risk and opportunity, we must understand the importance of pull. Understood and used properly, the power of pull can draw out the best in people and institutions by connecting them in ways that increase understanding and effectiveness. Pull can turn uncertainty into opportunity, and enable small moves to achieve outsized impact. Drawing on pioneering research, *The Power of Pull* shows how to apply its principles to unlock the hidden potential of individuals and organizations, and how to use it as a force for social change and the development of creative talent. The authors explore how to use the power of pull to:

- Access new sources of information
- Attract likeminded individuals from around the world
- Shape serendipity to increase the likelihood of positive chance encounters
- Form creation spaces to drive you and your colleagues to new heights
- Transform your organization to adapt to the flow of knowledge

The Big Shift Navigating the New Stage Beyond Midlife Public Affairs

The first part of this book discusses what you call love. Love is the most powerful energy -- you are made of this energy, so when you learn to harness it, you can do whatever you wish to do in your life. The second part contains powerful techniques for working with your DNA encodements. Discover how this process works so that you can make great changes in your life. Encodements will help you to do what some would call miracles. The third part contains what some call predictions, which are nothing more than my reading and interpretation of the energy at the time when the energy was read. Predictions can be changed to have a more positive result -- the point of my making predictions is so that you can change them. Dear one, each time you begin reading, I suggest that you do the following: Breathe in and out of your heart center and set your intention to tap into the energy of the message you are reading. Ask that you be given the secrets contained within the message and ask to be shown how to implement these secrets. The powerful knowledge you hold in your hands is dormant unless you choose to use it. Have fun exploring. As you read, I will have one hand upon your heart and one hand touching your mind. I am Amma, the divine mother of the divine mothers, and I am your mother.

This extraordinary book brings together many sources of important information

on the changes occurring within our world, ourselves, and the evolution of consciousness leading up to the year 2012. The text is addressed in part to Lightworkers, for whom the energy shift now gearing up has been ongoing for at least the last twenty years. The time is getting closer. The Great Shift is a progress report from the field and the messages are positive. “You don’t have to logically do anything but ‘show up’ with spiritual intent, and the DNA quantum field is activated in your body,” Kryon says. He tells us to expect changes and peace we may have never thought to see in our lifetimes, even in the Middle East. He says, “God is not a controlling force. Look for the love.” Thomas Kenyon channeling the Hathors, a group consciousness entity, reminds us, “It is your attention to an event that makes it conscious.” Kenyon also explains what channeled material is, which is important in understanding how we co-create our own world: “From the standpoint of neuropsychology, channeled information is just another expression of our brain/mind potential . . . a movement into the unknown territory of one’s own psyche to see what emerges in terms of contact (with other intelligences) and information.” The Hathors message for what is now and what is to come: “It is so simple, it is forgotten. . . . Find a way to live your life in joy and happiness.” Mary Magdalene, through Thomas Kenyon, makes it clear that restoring the balance between male and female energies will mean good

things for men as well as women and will reignite our creative potency. Patricia Cori channeling the High Council of Sirius reminds us that the future is never predetermined and the past is an illusion—different for each of us.

Articulating and illustrating how experience design can unlock experience innovation, this book offers a fresh perspective on effectuating corporate, public, social and whole system innovation by design. As such this is a highly provocative book for scholars, practitioners and students in the field of change and innovation.

This book tells the story of our changing world, and explores what it means for our future. It's organized as a narrative about the 83 most significant changes, or shifts, that are now occurring worldwide. But of course the individual shifts aren't nearly as significant as the fact that they're all occurring at the same time. While each one may be disruptive, 83 of them occurring all at once causes massive and unavoidable disruption. In case you haven't noticed, it's chaos out there. And actually it's more than disruption and chaos, it's the total transformation of the economy, society, and of our lives. My goal is to help you understand the emerging future, and how learn how to help your organization survive and thrive

amid the chaos of the emerging future.

Marc Freedman, hailed by the New York Times as “the voice of aging baby boomers [seeking] meaningful and sustaining work later in life,” offers a recipe for how we can transform America's coming midlife crisis into a midlife opportunity. Millions of people in their fifties, sixties, and seventies are searching for answers to the question “What's next?” and are navigating their way to an entirely new stage of life and work, one that could last as long as midlife. Shifting to a much longer lifespan isn't as easy as it may seem. Unlike the transition from adolescence to adulthood, managing this process for many is a do-it-yourself project. Drawing on powerful personal stories, The Big Shift provides not only direction but a vision of what it would take to help millions find their footing in a new map of life.

A national bestseller from one of this country's most influential pollsters and one of our most respected journalists For almost its entire history, Canada has been run by the political, media and business elites of Toronto, Ottawa and Montreal. But in the past few years, these groups have lost their power-and most of them still do not realize it's gone. The Laurentian

Consensus, the term John Ibbitson has coined for the dusty liberal elite, has been replaced by a new, powerful coalition based in the West and supported by immigrant voters in Ontario. How did this happen? Most people are unaware that the keystone economic and political drivers of this country are now Western Canada and immigrants from China, India and other Asian countries. Politicians and businesspeople have underestimated how conservative these newcomers are making our country. Canada, with its ever-evolving economy and fluid demographic base, has become divorced from the traditions of its past and is moving in an entirely new direction. In *The Big Shift*, Darrell Bricker and John Ibbitson argue that one of the world's most consensual countries is becoming polarized, exhibiting stark differences between East and West, cities and suburbs, Canadianborn citizens and immigrants. The winners-in both politics and business- will be those who can capitalize on the tremendous changes that the Big Shift will bring.
