Love challenges readers to stop wondering if their ship will ever come in and start looking at the gifts and talent God has placed inside of them. Nothing is outside believers reach because with God all things are possible.

Transform your hobby or talent into a side hustle that will provide you with inspiration, fulfillment, and a fortune. This book is the energetic motivational injection to help you overcome your fears and doubts.

I saw Christ during a near death experience (NDE) in January 1969 while buried beneath a pile of biomaterial, outguessing poisonous methane gas. I had multiple compound fractures and no air. To this day, I swear it being as real as you, me or anyone else. Yes, I saw the tunnel of light with Christ at the opposite end. The Christ I saw had long brunet hair—the one I knew from Sunday school and books.

Now that I have actually studied the Bible, I know He almost certainly had short hair, like his peers, the other men in his culture. Check it out. First Corinthians 11:14 says, “Does not the very nature of things teach you that if a man has long hair, it is a disgrace to Him?” God Himself thought long hair on a man was an abomination. It's obvious that is a disgrace for a man to have long hair! The most common word to describe long effeminate hair is the very word Paul used in First Corinthians 11:14: “degrading” (atimia), the major reason for objecting to long hair. How do we explain all the pictures of Christ depicted with long hair? Is that delusional thinking at the mass level? Again, did the Holy Word mislead us poor ignorant Christians, or did we fill in the gap for God? I’m laying my money on God – long hair was abhorrent to Him. As such, His son arrived with short hair. Now if Christ was anything like today’s youth, he would have rejected long hair – it simply wasn’t in style. Is humankind’s vision of Jesus just a delusion? Is the phenomenon of UFOs but another case of MASS delusion? It has happened before and within the past one hundred years –“Invasion of Mars”, Orison Well’s Broadcast. Could be, but humankind has been reporting them through word, paintings, or hieroglyphics since 29,000BC. If one buys into that, but not into UFO’s, then one must conclude that the entire world, since the beginning of time, has BEEN A DELUSION.

Happiness at work.....your quality of life and sometimes your life depends on it. Work is an important part of the life of the modern man, as it always has been, but work has become more complicated than before. Today what we do is often done as a part of a large organisation. The work is often abstract manipulation of matter or information, and the value created by the single member of the organisation has become increasingly difficult to measure. Organisations have become increasingly responsible for not only the physical work environment, but also for the mental working environment, and factors like stress and sexual harassment are becoming more and more regulated by company rules and culture. The health of the employees has become a major financial interest of the company as only healthy employees and leaders can perform optimally. Often the companies have health insurance for their people. Today employees and leaders also expect work to provide their life with meaning and stimulating experiences and developing challenges. Scholarly knowledge is substituted with experiential learning in a developing and dynamic environment. Society is developing fast and only companies with modern, well-oriented and culturally integrated employees can win the competition by offering customers, clients or patients the best products and services. A strong association between quality of life, development of personal

character, self-realisation, development of talents and skills, physical and mental health, meaning of life, sense of coherence and similar core concepts of modern medical and psychosocial sciences have in many studies now been strongly associated with work satisfaction, joy on the job and similar concepts. The scientific challenge we have taken upon our shoulders is to put the whole messy and chaotic area in order, and create a formula according to which the actual integrated status of worker can be calculated. We have decided to call the integrated concept of all above mentioned dimensions for working life quality, similar to the well-known global quality of life concept in medicine and social sciences. We are proud to present, in the present book, a mathematical formula from which the created value of an employee or leader can be known, if only the working life quality is known. We also provide a questionnaire for measuring the quality of working life, based on a theory of quality of working life. We have in a study on a random sample of the Danish population found a strong statistical association between the measured quality of working life and health. We started the research in quality of working life in 1994, and the first version of the QWL-theory was ready in 1996. In 1997 it was empirically tested in a study involving 1,500 persons and 30 companies. After adjusting the questionnaire and analysis of the data we further improved our

understanding to the level that we are happy to present in this book, based on a number of published scientific papers.

Distinct from any other publication with statistics on Central and East European countries and the former Soviet Union, it reveals why and how new statistics are being collected and what still has to be done in order to make their national data compatible with the rest of the world. The authors discuss the problems involved in the measurement of employment (in both the state and the private sectors) and unemployment, the collection of reliable wage statistics, and the development of new economic classifications in line with those internationally recognized and adopted.
